CAPE FEAR ACADEMY

Speaking for *Success.*

Find your voice. Find yourself. Find your future.

In a rapidly changing technological and professional landscape, the power of public speaking endures as an essential tool for discovering one's self, sharing ideas, and inspiring others.

We take the fear out of public speaking by embedding speaking opportunities into our academic, social, and extracurricular programs from the very beginning of a student's journey. Through our carefully developed Speaking for Success program, we help all students, not just the naturally talented talkers, develop the skills required to become confident, authentic communicators.

The program starts small because we believe that even when a student speaks a little, they grow a lot. From the performance of *The Mitten* in Kindergarten to culminating AP Research presentations by seniors, Speaking for Success allows students to master the art of public speaking one support-filled experience at a time.

Speaking our Core Principles Aloud.

Academic Excellence:
Listen to our graduates speak, and you'll see how our programs gives them the skills to be excellent.

Opportunity:
Each and every student participates in meaningful public speaking moments that help them believe in themselves as much as we believe in them.

Character:
Speaking assignments require students to share personal conceptions of respect and integrity, demonstrate resilience in the face of missteps, and model public accountability.

Community:
Through consistent gatherings, faculty modeling, and evolving leadership opportunities, students see and harness the power of words to strengthen communal bonds.
