

ICS Drop-Off & Pick-Up FAQ

Accessing Campus

What route should I use to access campus?

Please use 110th Ave NE and NE 65th Street to access campus. Vehicles should enter campus only by making a right turn from NE 65th Street. **There is no stopping, parking, or waiting on neighborhood streets during student drop-off or pick-up.**

Should I use 112th Ave NE or 111th Ave NE to access campus?

No. Please do not use either of these routes to enter campus. Using them can worsen congestion and create unsafe conditions. Note: vehicles on NE 65th Street have the right-of-way.

Morning Drop-Off

Where should my student exit my vehicle during morning drop-off?

Students should exit only from the curbside in the designated drop-off zone (highlighted in green on the map). For safety, students should not exit on the traffic side of the vehicle or in areas outside the designated drop-off zone.

How can I be a superstar and help keep the morning drop-off line moving?

Please pull as far forward in the drop-off zone as possible before having your student exit your vehicle. If space allows, pull all the way to the east end of the flagpoles. **When backups occur, please use either of the new extended zones to safely drop off your student.** Students should be ready to exit your vehicle efficiently, with backpacks and belongings with them rather than in the trunk.

Can't I just drop off my student at the corner nearest the front door?

Please pull as far forward as possible – all the way to the end of the flagpoles if you can! Stopping early means your student may save a few steps, but it also means you may be delaying the vehicles waiting behind you.

Why can't I just skip the line and drop off my student in the parking lot?

The main parking lot is closed during morning drop-off to prevent vehicles and pedestrians from crossing the drop-off route (causing congestion and safety issues). If you need to park in the morning, please use the student/parent parking lot in the southeast corner of campus (labeled in blue on the map). This is a great option if your student has a lot of belongings that need unloaded too!

Afternoon Pick-Up

What changes during afternoon pick-up?

During afternoon pick-up, both the student parking lot and the main parking lot may be used as you wait for your student. If there is a backup, please use the new extended zones to pick up your student.

Can I park in the neighborhood and have my student walk to me?

No, there is no stopping, parking, or waiting on neighborhood streets during student drop-off or pick-up.

What should I do if I am waiting in the pick-up zone?

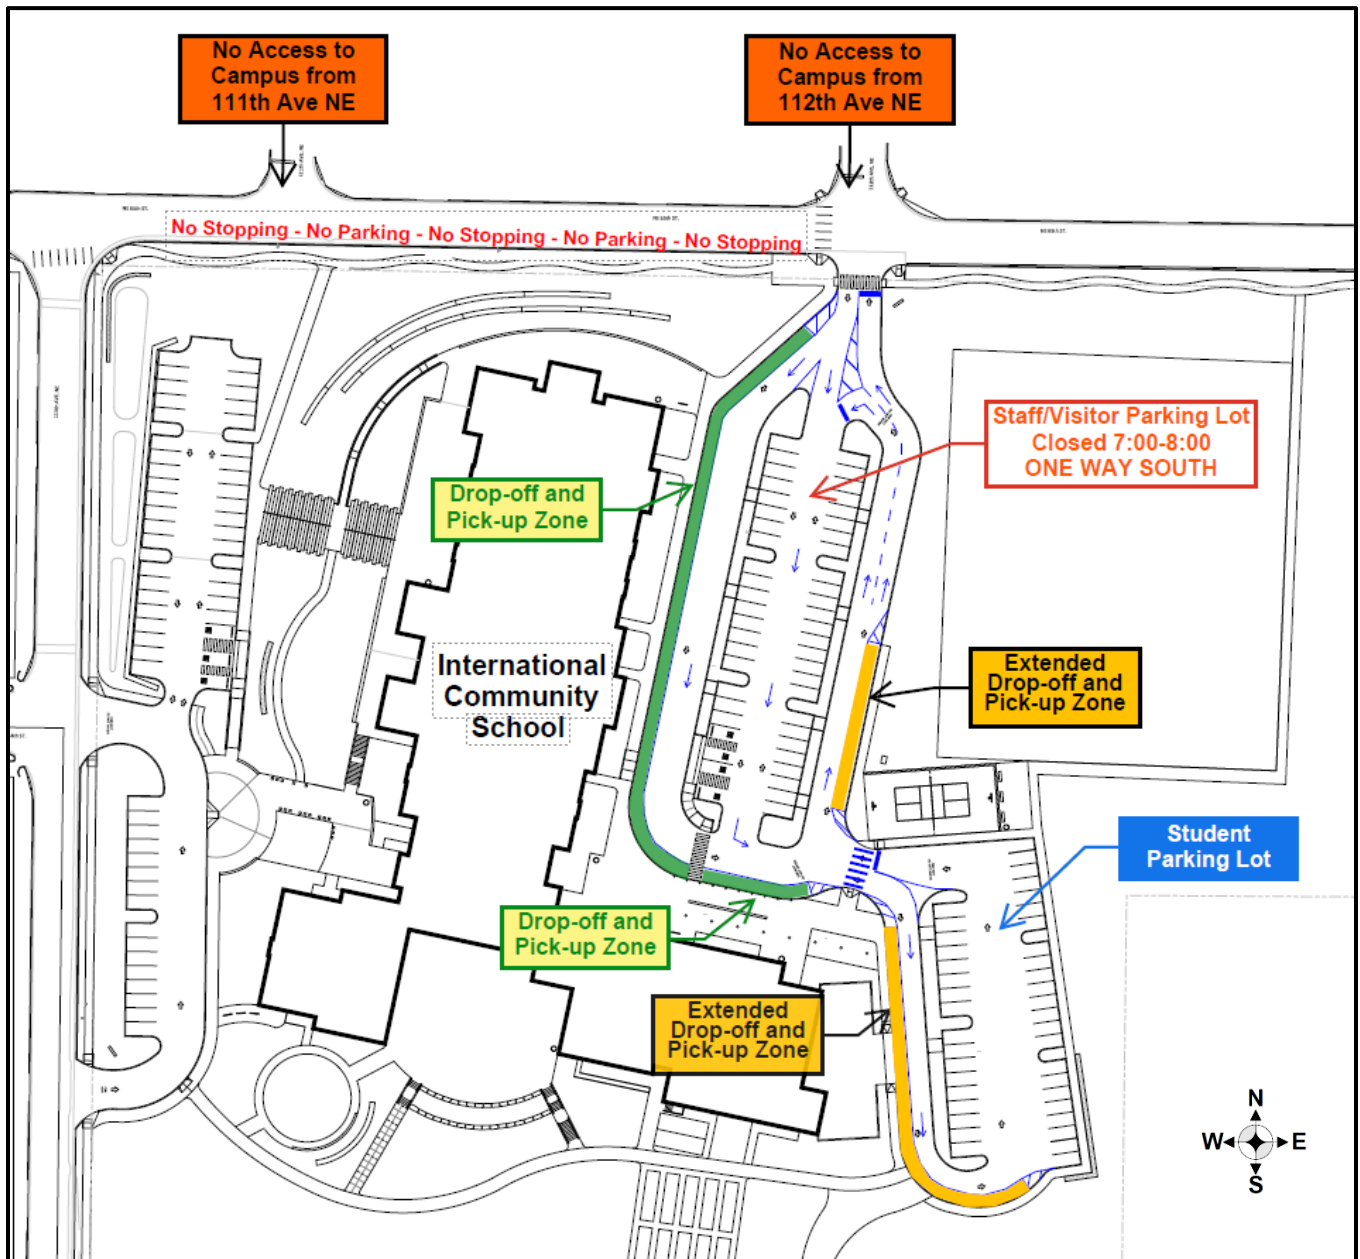

If you are waiting in the pick-up zone and space opens in front of you, please safely pull forward so additional vehicles can enter campus. As you wait, please turn off your gas/diesel vehicle so exhaust does not enter the classrooms through the air handling systems.

General Considerations

Be patient and take your time! Please do not honk, block intersections, or block driveways. And please watch carefully for cars passing in the drop-off zones, students exiting vehicles, and pedestrians in the parking lots. One rushed moment can lead to a tragic incident. Please note: the main parking lot is one-way (south) for vehicles.

Always use caution when exiting the campus. Come to a full stop at the stop sign, check all directions for vehicles and pedestrians, and remember that cross-traffic on NE 65th Street has the right-of-way and does not stop.

Pro-Tip: Avoid the morning drop-off rush!
Students may be dropped off as early as 7:20!

Noteworthy Changes

- The Main Parking Lot is ONE WAY (south). It remains closed during morning drop-off but is available for use if you are waiting during afternoon pick-up.
- There is no stopping, parking, or waiting on neighborhood streets during student drop-off or pick-up. If a back-up occurs, drive onto campus and use the extended drop-off and pick-up zones.
- Remember, you can also use any of the parking lots for afternoon pick-up.
