KAMI IN ACTION: ENGAGE, ANNOTATE, COLLABORATE

Kami is an interactive digital annotation tool that transforms PDFs and documents into engaging, collaborative learning experiences. It allows students and teachers to highlight, comment, draw, and provide feedback in real time, while supporting diverse learners through accessibility features like text-to-speech and voice typing.

01 Core Annotation Tools

- Highlighting, underlining, strikethrough, and text boxes to mark up PDFs and other documents.
- Drawing and shapes for visual annotations and diagrams.
- Commenting tools using text, voice, and video comments to give feedback or add thoughts directly on the document.

02 Collaboration & Interaction

- Real-time collaboration, so multiple users can annotate and contribute at once.
- Class View, which helps teachers view, grade, and give feedback on student work in one place.

03 Accessibility & Support

- Read Aloud and text-to-speech to support diverse learners and comprehension.
- Voice typing and multilingual dictionaries to support writing and ELL students.

04 Integration & Workflow

- Seamless integration (Google Classroom, Canvas, Schoology) for distributing and collecting work.
- Cloud storage sync with Google Drive or OneDrive, auto-saving student work.

05 Additional Helpful Features

- Split & Merge documents, useful for creating customized resources from multiple PDFs.
- Kami Library templates with ready-to-use lesson formats.
