How to use the exit ticket builder:

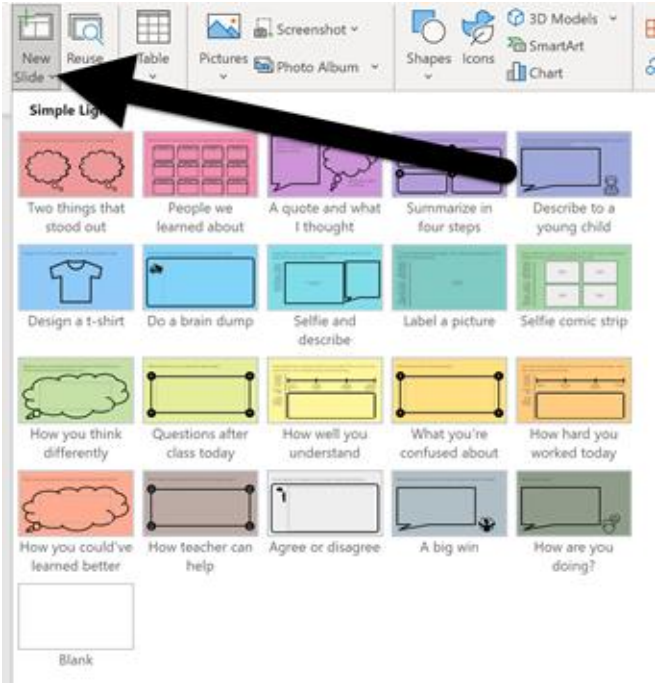

Open this exit ticket builder in PowerPoint.

Add exit tickets by clicking the **down arrow** on the *New Slide button.* Then click an exit ticket to add it to this slide deck.

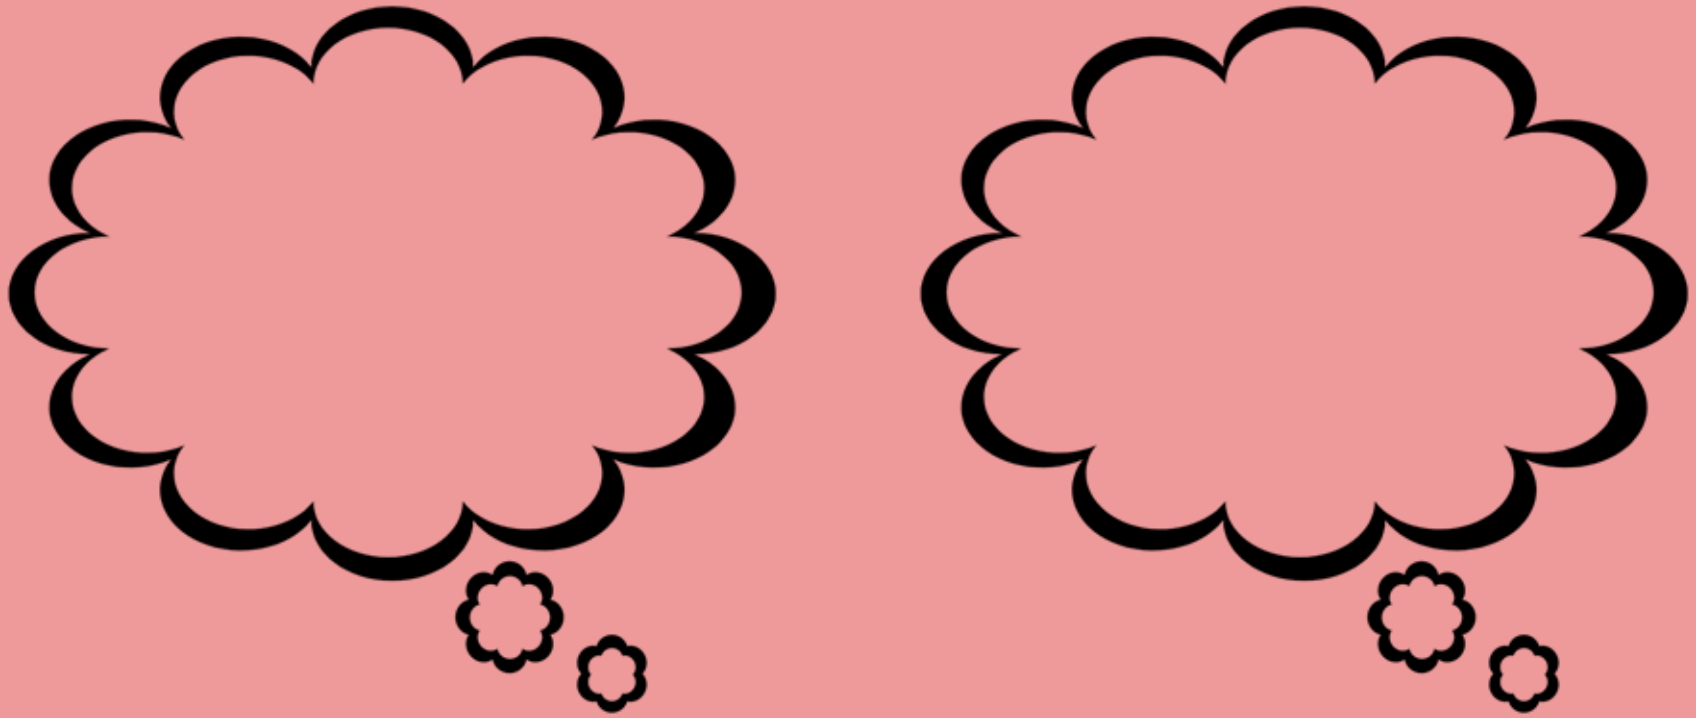

Before you add slides, you can **modify any of them in the master slide** by clicking the "View" menu and "Slide Master." You can adjust the wording of text or add new things there.

When you've added your exit tickets, **save the file** with a name to reflect the day you're assigning it (i.e. "January 20 exit ticket") and **delete this instructions slide**.

Assign it to your students with Google Classroom.

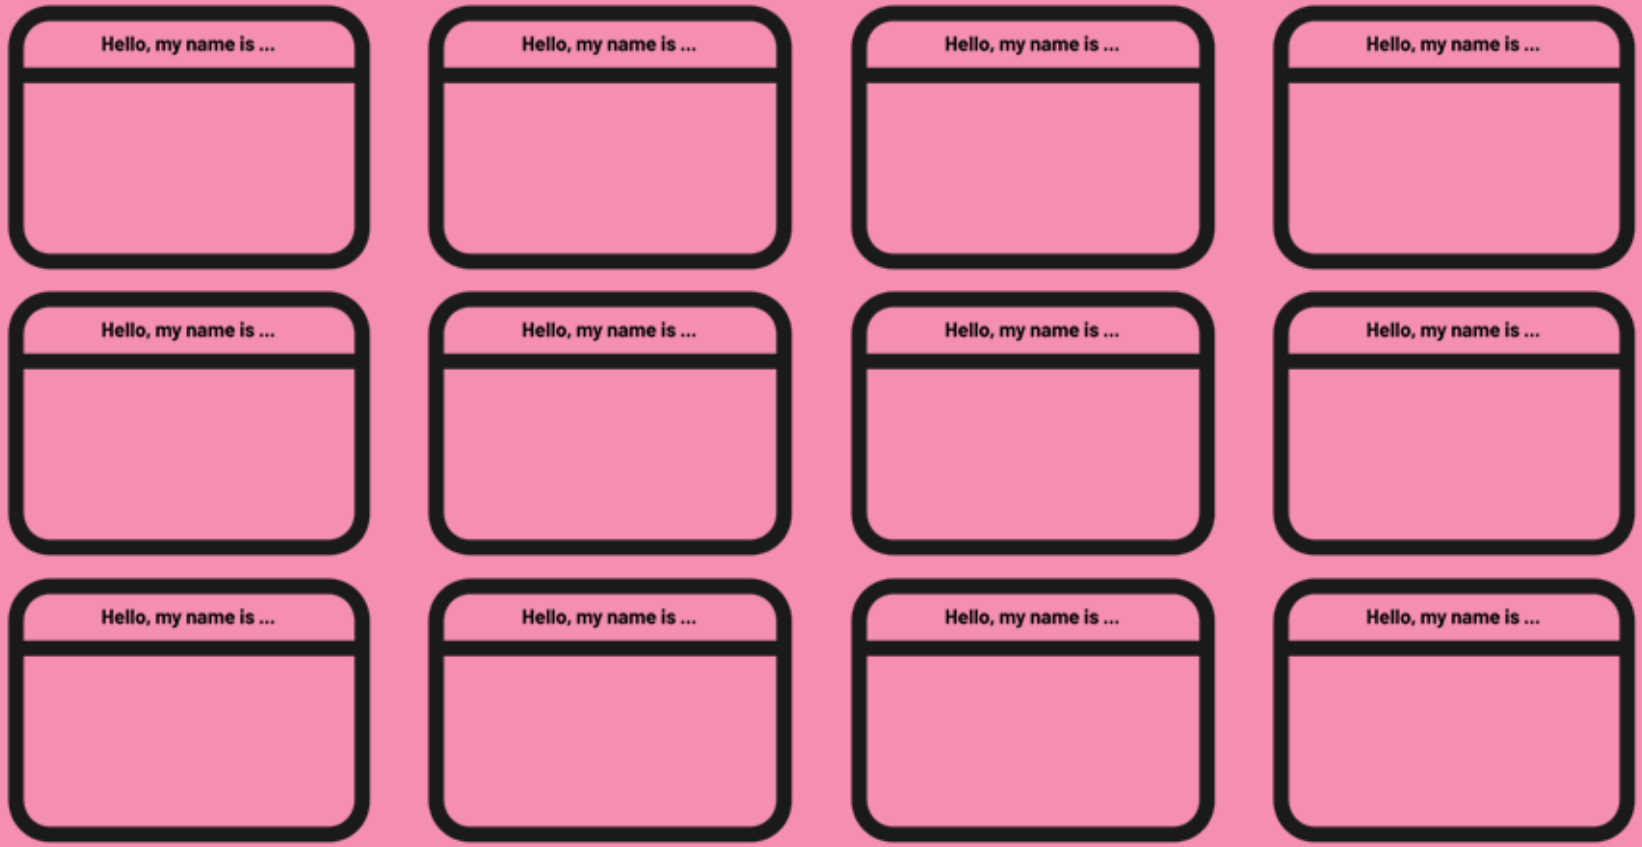

What two things stood out to you most from class today?

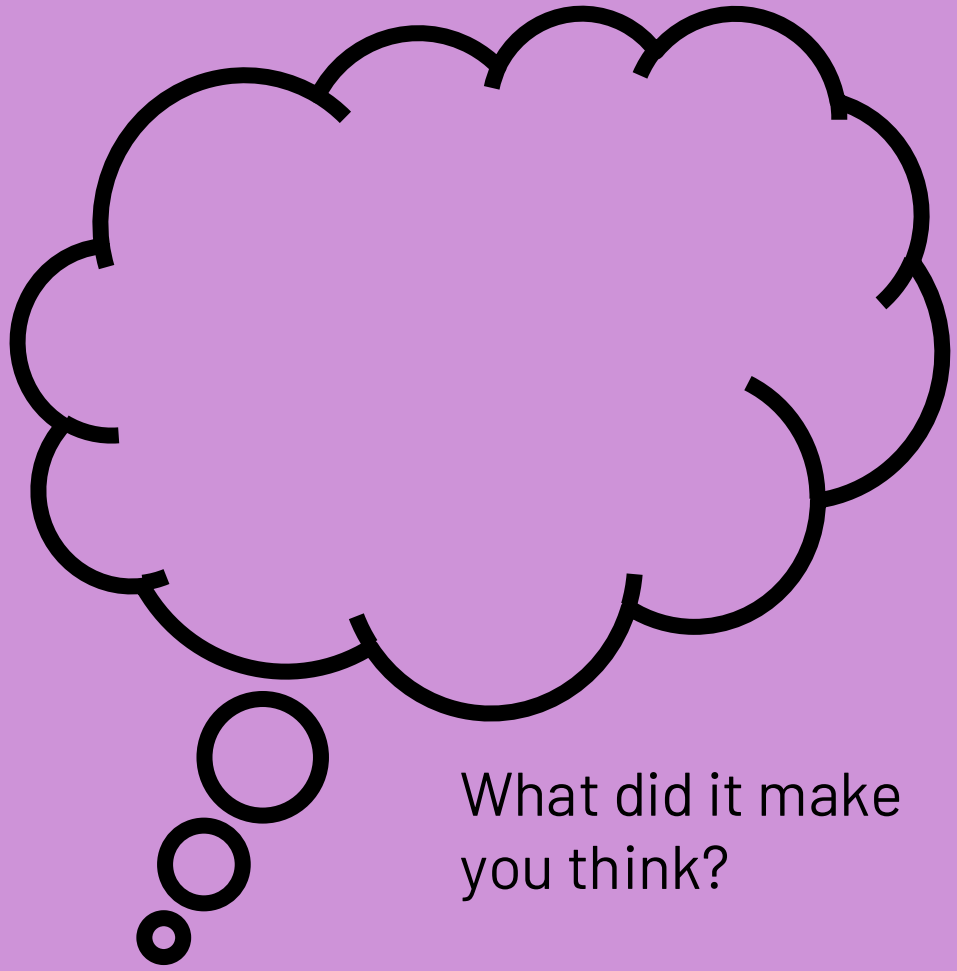

Design a t-shirt that represents something you learned today.

Write names of as many people you learned about today as you can.

What's something someone said that really made you think?

What did it make you think?

Do you agree or disagree with the topic today? Describe why.

What’s a big win you had in this class or another class this week?

How are you doing?

Summarize what you learned today in just four steps.

1

3

4

If you had to describe what you learned today very simply to a young child, how would you describe it?

What could you have done today to help yourself learn better?

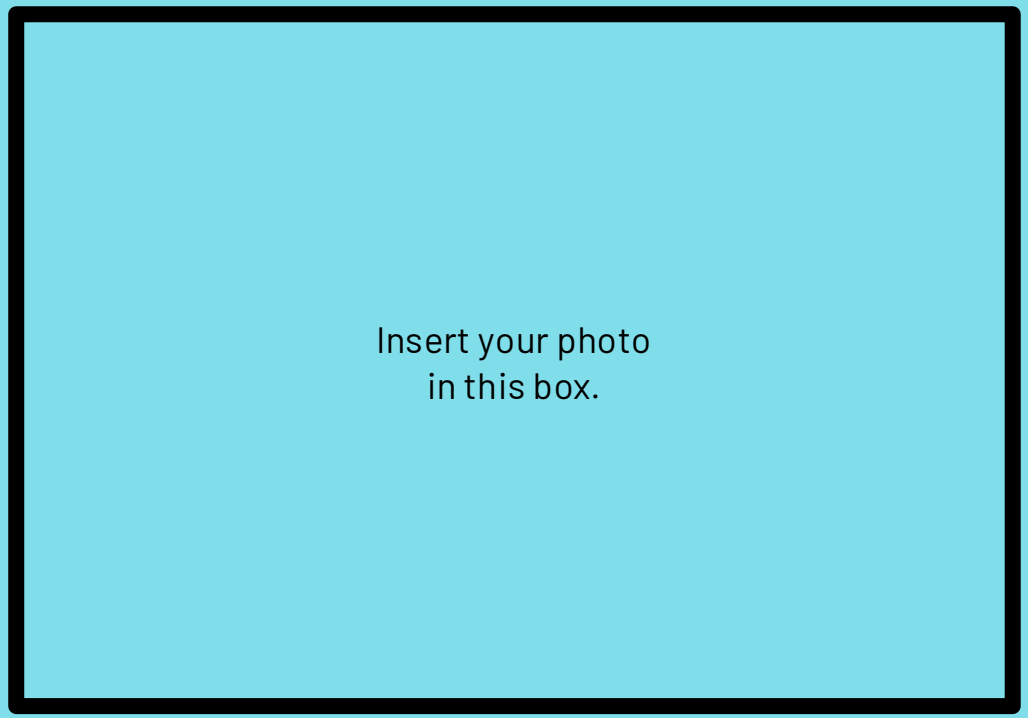

What could I (the teacher) do differently to help you learn?

Snap a selfie with your reaction to something you learned. Then, describe why you reacted that way.

To insert an image, use the Camera app on your laptop. Use the search bar next to the Windows button and type “Camera” to find it.

Find a picture from today's lesson. Then, draw arrow shapes on it to label the important parts.

To insert an image, go to the "Insert" menu, then "Pictures," then "Online Pictures." Find an image. Click it, then click "Insert."

To insert an arrow shape, go to the "Insert" menu, then "Shapes," then "Arrows." After you insert an arrow, you can double-click it to add text.

Snap 4 selfies to make a comic strip. In the comic strip, use speech bubbles to show what the character did or said.

To insert an image, use the Camera app on your laptop. Use the search bar next to the Windows button and type “Camera” to find it.

To insert an speech bubble, go to the “Insert” menu, then “Shapes,” then “Callouts.” After you insert one, you can double-click it to add text.

How hard did you work today? Put a circle on the scale below. Then, describe why you feel that way.

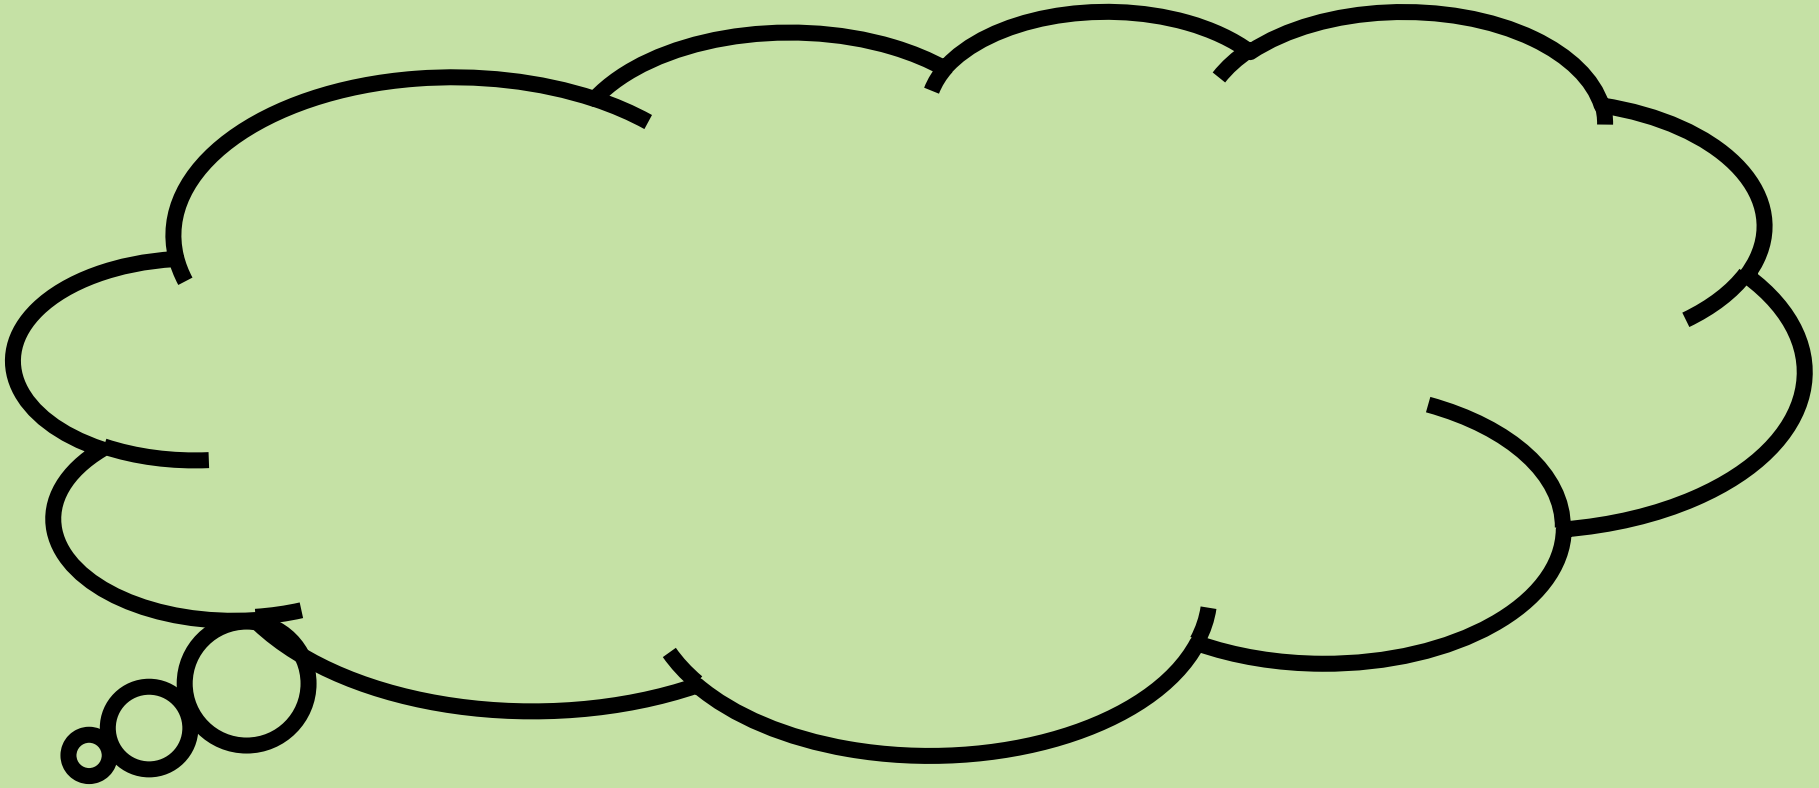

To insert a circle, go to the "Insert" menu, then "Shapes," then choose the circle.

Click and drag to draw the circle.

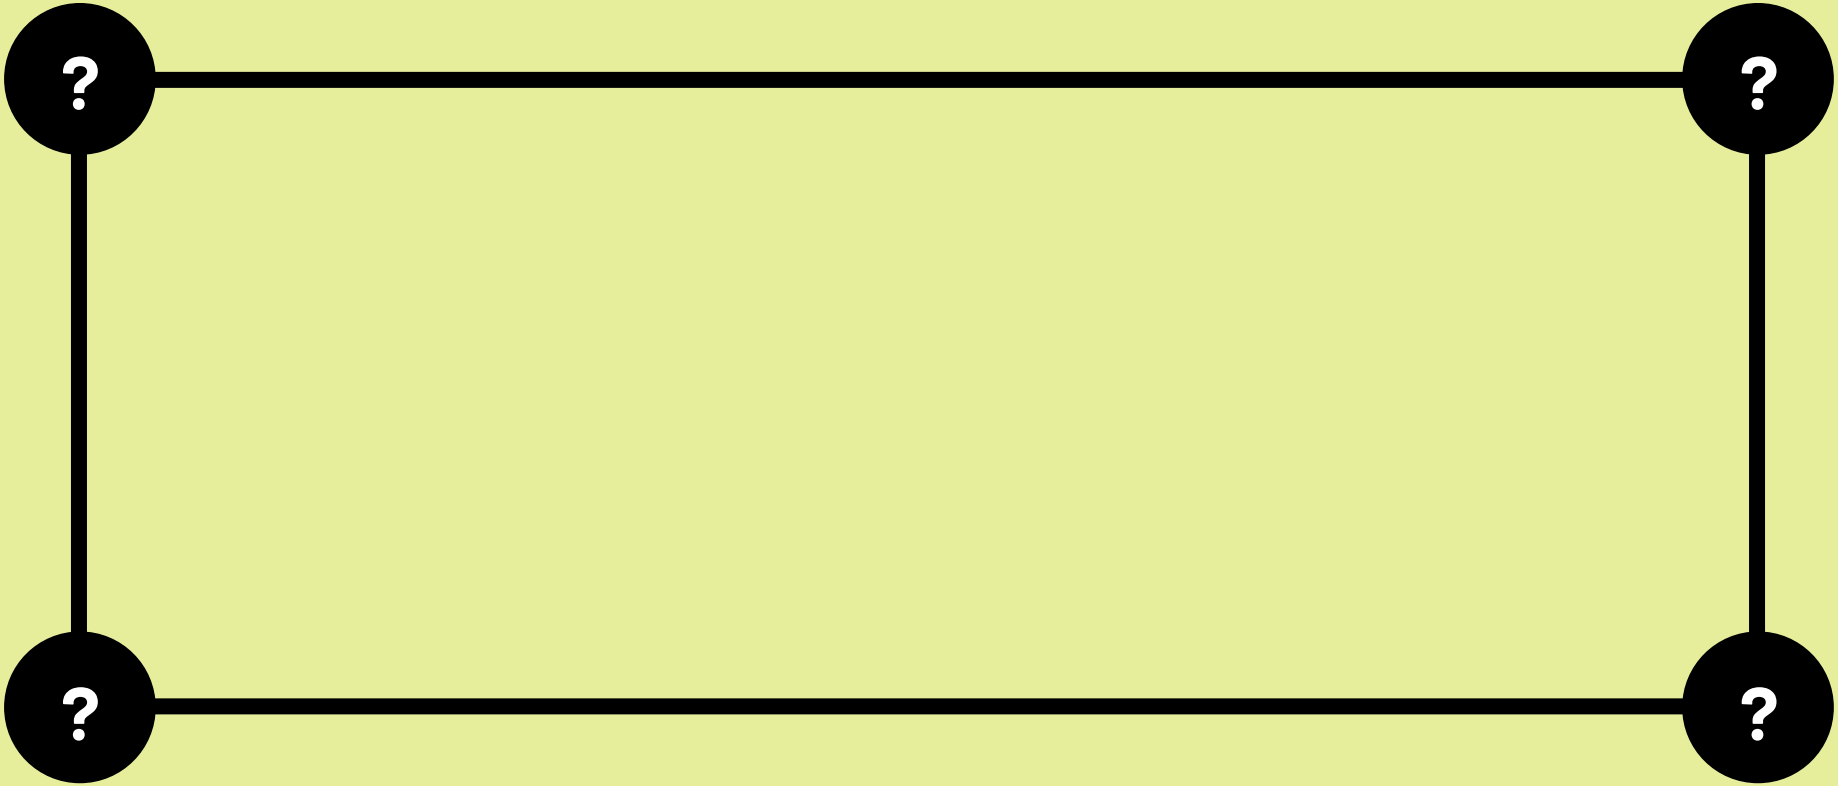

Then, drag the circle onto the scale to show your understanding.

Based on what you learned today, how does it change what you think? What will you do differently now?

What questions do you have after class today?

How well did you understand what we did today? Put a circle on the scale below. Then, describe why you feel that way.

To insert a circle, go to the "Insert" menu, then "Shapes," then choose the circle.

Click and drag to draw the circle.

Then, drag the circle onto the scale to show your understanding.

What are you most confused about?

How hard did you work today? Put a circle on the scale below. Then, describe why you feel that way.

To insert a circle, go to the "Insert" menu, then "Shapes," then choose the circle.

Click and drag to draw the circle.

Then, drag the circle onto the scale to show your understanding.
