The world's tallest waterfall is in South America. Angel Falls starts 3,212 feet (979 meters) in the air. Water drops 2,648 feet (807 meters). Then it flows a bit farther. Then there's a small, second drop of about 100 feet (30 meters).

Why is it called Angel Falls? You might think it's because it's so high up. Really, it's because of James Angel. He was the first pilot to fly over it. Planning your own visit? It's not easy to get to. Be ready to fly, boat, and hike. Angel Falls is deep in a jungle in Venezuela.
