Library Information for Families

Parent/Guardian Access to Follett Destiny

Did you know you have online access to your student's library account? Read the information below to learn more about logging in to navigate Follett Destiny!

What is Follett Destiny?

Follett Destiny is Waco ISD's online, integrated management system for library resources. Parents and students have access to our online catalog through the district website. We encourage parents and students to begin exploring our collections and learning about the wide variety of resources available for checkout.

How do I access my student's account?

As parent or guardian, if your email address is connected to a student in Destiny Library Manager, you can access their library information and the parental control features. Scan the QR code below or click HERE to log in with your personal email address associated with your student's account.

What if my email address does not work?

If your email address does give you access, make sure to try all email addresses that could be attached to the student account. If needed, please reach out to the Gholson ISD staff for additional help.

Do not hesitate to reach out if you have any questions or concerns. For more information, go to the school library webpage at https://www.https://www.wacoisd.org/community/library-services.org/school-libraries.
