How the comparisons work

The four scores

Every score is on Wisconsin DPI's 0–100 scale. Report Card is the Overall Accountability score; the others are the Growth, Reading (ELA), and Math components.

Demographic measures

Free/Reduced is DPI's Percent Economically Disadvantaged (the standard free/reduced-lunch proxy). Special Ed and English Learners follow the report card.

Comparable schools

For each school we find the five most demographically-similar Wisconsin schools — weighted by free/reduced lunch first, special education second, English learners third.

Comparable districts

Districts are matched the same way, with enrollment added as a size guard so peers are similar in scale as well as demographics.
