

Emergency Evacuation:

In the event the A.W. Beattie Campus needs to be evacuated during the school day for an emergency on campus or in the community the following protocols and procedures will be adhered to for the safety of all students and staff:

1. Parents/Guardians please do not come to the A.W. Beattie Campus. Babcock Blvd. is a two-lane road with a single lane going in each direction and the campus has a single entrance and exit. Babcock Blvd. and the Beattie entrance will be blocked with emergency vehicles.
2. A.W. Beattie will coordinate a safe family reunification location with our emergency services partners. Family members picking up students will need to provide proper identification that matches a student emergency record on file at the designated reunification location.
3. Student drivers will not be able to leave in their personal vehicles. This is for accountability during the emergency. Student vehicles will be released at the conclusion of the emergency event.
4. Communications will be provided through:
 - KDKA – WPXI – WTAE
 - www.beattietech.com
 - Career Center's Electronic Messaging System
 - Parent Square
5. Please remember to update the Career Center with any changes that impact a student's emergency contact information.
 - Phone numbers – Cell/Emergency Contacts
 - Family members listed on a student's emergency form

We hope to never have to follow these protocols and procedures. Preparedness is essential for the safety of all students, staff, and our families.
