

RAPTOR TECHNOLOGIES

THE GOLD STANDARD IN SCHOOL SAFETY

Raptor® StudentSafe™

Empowering Schools with Early Intervention Software

StudentSafe, a patented technology by Raptor, enables schools to recognize, document, support, and manage the wellbeing of individual students through a secure and intuitive platform. It includes capturing low-level concerns, conducting assessments for behavioral threats and suicide risks, and managing cases for positive student outcomes.

With early intervention, school counselors and Behavorial Threat Assessment (BTA) teams can address concerns more effectively. StudentSafe makes it easy to monitor progress and prevent students from slipping through the cracks.

Why Do Schools Need StudentSafe?

StudentSafe technology provides school counselors and BTA teams with complete student history, enabling them to identify root causes of concerning behavior faster. This promotes student success, reduces disciplinary rates, and minimizes risk of harm to oneself and others. This also helps reduce liabilities by identifying potential issues upstream, making them easier to manage and preventing information silos. Established methodologies and workflows ensure consistency and fidelity in assessments.

StudentSafe Benefits

Visibility

Empower staff to contribute data and build a chronology for a holistic view of an individual student's wellbeing.

Privacy

Ensure student privacy with highly configurable permissions, access and data retention policies.

Proven Methodologies

Includes Behavioral Threat and Suicide Risk Assessment models to ensure a proven approach to threats of harm to self and others.

Action-oriented

Allows staff to identify, document, support and manage all facets of the student's wellbeing in one secure, central repository.

StudentSafe™ Features

How does it work?

Staff and administrators can easily enter low-level concerns for students on StudentSafe by selecting the student and category and entering a few notes. The dashboard provides a quick view for authorized staff to identify students who may need early help. If there's a concern for safety that warrants a suicide risk or behavioral threat assessment, it's escalated within StudentSafe. The student's chronology is accessible to inform and streamline the process, with all tasks and follow-ups documented for a secure and centralized repository of information.

What is included?

Raptor StudentSafe software includes the ability to:

- Document and manage low-level concerns
- Create student chronologies
- Conduct behavioral threat and suicide risk assessments
- Manage cases
- Gain immediate insight through alerts and robust dashboards
- Identify trends and gaps with full-scale reporting and more.
- Recognizing and recording low-level concerns for earlier intervention.

"StudentSafe is a tremendous asset. I've been doing threat assessment for about seven years. For me, three key benefits of Raptor StudentSafe is that the organization of the app itself completely walks you through the process, it gives you the ability to collect all that data and analyze it easily, and the ability to collaborate with each other is built in really well."

-David Wrzensinski, Director of Safe Schools
Robinson ISD, TX
