

WIZ KIDZ SPARK

CODE, CREATE & DISCOVER!

This hands-on program blends robotics, coding, math and public speaking to spark creativity and critical thinking.

-  **Hands-On Robotics & Coding:** Students take their first steps into coding through fun, hands-on activities. They learn how simple coding blocks can bring displays, pictures, messages, buttons, and movement to life.
-  **Math in Motion:** Students explore patterns, numbers, counting, and sequencing through playful coding challenges that make math feel interactive and meaningful.
-  **Patterns & Coding Challenges:** Kids discover how to put simple instructions in the right order and create patterns that make their projects work. Each week introduces a new coding challenge and exciting feature to explore.
-  **Collaboration & Creative Problem-Solving:** Young learners work together, share ideas, experiment, and help solve challenges while discovering that there can be many creative ways to make something work.

After School Program

Oct 7th - Dec 2nd | Wednesday | 1:55 pm - 2:55 pm

Tamarack Elementary School

Grades: 1 - 6 | Fee: \$179
