

Wall High School Expands Dual Enrollment Opportunities Through New Partnership with The College of New Jersey

A new partnership between Wall High School and The College of New Jersey (TCNJ) will provide students enrolled in Advanced Placement (AP) courses with the opportunity to earn college credit through Dual Enrollment.

This partnership reflects Wall High School's continued commitment to expanding rigorous academic opportunities and helping students prepare for success after high school. Through this initiative, students enrolled in eligible AP courses can earn TCNJ college credits while completing their coursework at Wall High School, giving them a valuable head start on their college education.

Why Participate in Dual Enrollment?

Taking a college-level course while in high school offers many benefits, including:

- Building confidence and preparing for the academic expectations of college.
- Earning transferable college credits that may be accepted at many colleges and universities, potentially saving both time and tuition costs.
- Receiving official college credit from TCNJ for successful completion of approved AP coursework.

How the Dual Enrollment Process Works

- Enroll in an approved AP course at Wall High School.
- Register [HERE](#) with TCNJ for Dual Enrollment and submit payment by the published deadline for each eligible course.
- Successfully complete the high school course by earning a final grade of C or higher to receive TCNJ college credit.
- Official TCNJ transcripts will be available after August 1 following course completion.

Additional Benefits for Students

Students who participate in the TCNJ Dual Enrollment program will also receive several additional advantages, including:

- Enrollment as a non-matriculating TCNJ student, providing access to TCNJ library services.
- A waived TCNJ undergraduate application fee (a \$65 value) for students who apply for admission.
- For students who later attend TCNJ, Dual Enrollment course grades will be included in their TCNJ GPA.
- College course equivalencies are determined by the appropriate academic department and are subject to periodic review.

Students enrolled in eligible AP courses and their families are encouraged to take advantage of this outstanding opportunity to earn college credit while still in high school.
