Spotlight Earth Day- April 22, 2026

Tonito Valderrama

Recycled Glow Bugs- Reduce, reuse, recycle with this creative upcycled art program! Transform plastic bottles into glowing artworks inspired by pollinating insects. Using pipe cleaners, paper plates, glow sticks, and beads, students turn trash into treasure, add sound for a musical maraca finale. A hands-on, multi-sensory project that celebrates Earth Day every day

Toe Sugar Tunes, Inc.- "One Bag at a Time" every day is Earth Day

Songs, Poems, and Movement to celebrate the Earth and the story behind the song created with my students that helped solve the single use plastic bag ecological dilemma in New York State.

Imagine That! Art Education

Go Green with Creativity! Recycled Robots- Discover how famous artists turned recycled materials into art, then create their own whimsical robots from reused items. A lively assembly that sparks creativity, conversation, and environmental awareness.

Leon R. Ognibene

Our Endangered Earth- Take an environmental virtual video field trips around the world to explore human impact on the planet. Learn about pollution, climate change, deforestation, ocean damage, and species extinction, while discovering solutions like renewable energy, recycling, and energy-efficient technology

Art & Nature Group, Inc.- CEED Going on a Nature Hike

A planned and guided exploration in a safe outdoor situation of your choice.- Each field trip is customized to reflect your classroom curriculum, such as birds, ecology, forests, soil and more. Destinations include; a park in district, out of district or let us host your classes at CEED's Nature Lodge
