

Dental Care 🦷🦷

Hi! My name is RubyStewart, and I have just started my Senior year in ISU's Dental Hygiene program!

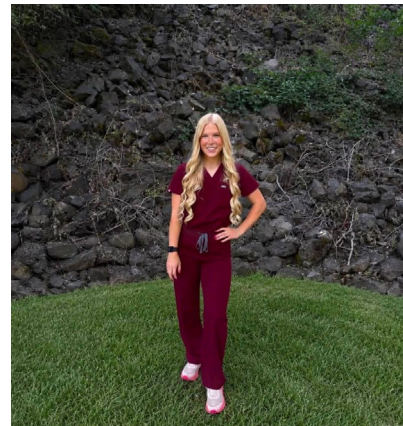

The ISU Dental Hygiene Clinic is a great option for families because it provides **high-quality dental care at a reduced cost**, while allowing dental hygiene students like myself to gain valuable hands-on experience to meet the program requirements. We also accept most insurances, including **Medicaid!**

Additionally, I want to stress the importance of regular dental visits for children; to help prevent cavities, identify oral concerns early, and establish healthy home care habits. Bringing children to the ISU Dental Hygiene Clinic gives them an opportunity to receive professional preventive care in a supportive learning environment!

This semester, I am looking for children **ages 3-17** in need of a cleaning!

Services offered include:

- DENTAL CLEANINGS
- X-rays
- Sealants
- Custom whitening trays
- Cavity fillings

Please feel free to message me or share this information with any family or friends who might be interested in any of these services! Thank you so much!!
