ABOUT ME

- This is my fourth year at IA and I love it!
- Previous experience was at Fulton Science Academy teaching math, AP Research, AP Psych, and more.
- I also teach Music Tech at IA and tutor math. I love creative projects and encourage students to use this class to pursue their passion. Bonus points if they can use their Pinnacle project as part of another class!

COURSE CONTENT

- The students are responsible for conducting and creating an original project that expresses their interests.
- Ideally, their project leverages skills and concepts they've learned in core classes and pathway courses.
- All content and instruction can be found on the class Canvas Page.

COURSE EXPECTATIONS

This is a course of individualized exploration. The expectation is that the student will seek knowledge and be able to convey this in a summative Pinnacle Project

We don't do traditional tests or quizzes. Instead, grades will come from group discussions, check-ins with the teacher, and peer feedback.

COURSE SUPPORT

- When in doubt, ask your teacher during class or other students in the class
- If you have a passion and know someone in the school who is an expert on that topic, reach out to them!
- Tutoring is available on Flex Friday mornings, but most work should be done in class. Each week will offer time for individual work.
