Programming, Games, Apps & Society

Junior & Senior level course

Project based

Use of AI tools is allowed and encouraged in the building of our applications.

Students will be maintaining a work log and an analysis journal to assess their learning throughout a project.

Students will be working on independent and group IT projects.

Students will have opportunities to select skills, languages, and/or topics. They will be designing their own projects.

Grading in PGAS classes

Category	Weight	Description
Major	55%	Programming Projects, Major checkpoints, Portfolios
Minor	35%	Checkpoints, work samples , presentations
Practice	10%	Teacher interviews, spot checks on work logs, research on instructional platforms.

- Work that is turned in after the deadline will receive a ten-point deduction.
- If a major project/portfolio is late, it must be submitted prior to the grades are released to get full credit – 10 points. If it is turned in after the grades are released, it moves into a recovery category and can receive a max of 75.

Late work policy

Students who have received a grade below 75% on a major test/project can recover their grade through the Grade Improvement process.

- The maximum grade that can be earned is 75%.
- Students must initiate the recovery process.
- **Students have one recovery opportunity for each major. It must be competed prior to the next major assessment.**

Recovery Policy

- 8:15 – 8:45 am (M, T, Th) by appointment with Mrs. Whitlock
- Fridays from 8:55 -10:15 in the hangar with Mrs. Whitlock. Sign up for my tutoring time.
