

Vision

Every student will know they belong, empowered by meaningful mentoring relationships to thrive as their authentic selves.

Mission

Students will develop meaningful connections with caring mentors who foster hope, resilience, and social-emotional growth, empowering them with the confidence to thrive as their authentic selves.

Values

Belonging:

We create meaningful connections where every student feels seen, heard, valued, and free to be their authentic self.

"I can be myself here, and I matter"

Equity & Inclusion:

We recognize and value each student's identity, experiences, strengths, and needs, so every student has the support and opportunity to thrive.

"My identity, experiences, and needs are recognized and valued"

Trust:

We build relationships through consistency, reliability, respect, and listening with understanding.

"I have someone I can count on"

Empowerment:

We help students recognize their strengths, develop their voice, advocate for themselves, and see possibilities for their future.

"My voice matters, and I have the power to make choices for myself"

Hope:

We help students believe in a positive future and strengthen their ability to find pathways toward it.

"I can see possibilities for my future and a path to get there"
