

SAT Scores on Transcripts

The Colorado Department of Education (CDE) is providing clarification regarding **SB20-175: Student Score on Transcript** and the reporting of student performance on readiness assessments.

This act prohibits a student's level of performance on the readiness assessment administered pursuant to 22-7-1006.3 (SAT) or on a national assessment (any assessment administered throughout the United States to measure postsecondary or workforce readiness) from being indicated on the student's high school transcript.

What Does This Mean for Schools and Districts?

Student performance levels or achievement indicators from the SAT or other qualifying national assessments **must not be included on a student's high school transcript.**

Schools and districts should review their transcript systems, templates, and reporting practices to ensure compliance with this requirement.

Important Distinction

This provision addresses the **inclusion of a student's level of performance on the high school transcript.** It does not prohibit schools or districts from maintaining or accessing assessment results through authorized assessment reporting systems or providing student score reports through appropriate channels.
