SPECIAL NOTICE

Asbestos Management Plan for the Powell County School District 2026-2027

Parents, Guardians, Students, and School Employees

This notice is being issued to concerned individuals. This school meets both national and state regulations that relate to asbestos-containing building materials that were used in building construction in past years.

An inspection for building materials that contain asbestos has been completed for all buildings owned, leased, or otherwise occupied by the Powell County School District. This inspection has been conducted by a certified inspector, and the sample materials were evaluated by an accredited laboratory. Building materials with as little as one percent (1%) asbestos content have been identified and have been made part of an Asbestos Management Plan for the school district.

A complete Asbestos Management Plan for the school is on file at the district office and is available for your review.

We will continue to notify the public at least once annually on the status of the Asbestos Management Plan. Should it be necessary, more frequent updates will be issued from additional inspections, normal surveillance practices, response actions, or remodel work that might disturb building materials that contain asbestos. Every precaution will continue to be used in order to protect the well-being of students and employees of the Powell County School District.

Coy Hall, Chief Operations Officer & LEA Designee
