

NORTHVIEW HIGH SCHOOL

Welcome to The Northview Experience featuring our 3DE Magnet Program and 13 Career Pathways

Northview's vision is to empower all students with the knowledge, skills, and mindset to thrive in a dynamic world.

The Northview Experience

- ▶ Northview is the #1 COMPREHENSIVE high school in the State of Georgia according to US WORLD REPORT.
- ▶ Northview ranks among the highest-scoring public high schools across the state of Georgia with an average SAT score of 1260.
- ▶ Northview prides itself in the variety of opportunities, with students excelling in academics, the 3DE magnet experience, science and technology, medicine, business, the performing and visual arts, world languages, club activities, and athletics.
- ▶ In 2026, College Board recognized Northview as an AP Platinum School - the only comprehensive public high school in Georgia to earn this distinction! This award recognizes Northview for successfully preparing students for college and career readiness while expanding equitable access to Advanced Placement coursework. This distinction highlights Northview's sustained excellence, broad access to a varied and rigorous curriculum, and high achievement across a non-selective student population.

NORTHVIEW HIGH SCHOOL

Northview's 3DE Magnet Program

RE-ENGINEERING EDUCATION TO INSPIRE AND PREPARE YOUNG PEOPLE TO BE
GLOBAL PARTICIPANTS AND LEADERS

HISTORY OF 3DE AT NORTHVIEW

- 3DE started at Northview in 2018. We were the 2nd school in Fulton County and the nation to onboard 3DE.
- We began with a few courageous students willing to take a chance and have grown to over 340 students.
- 3DE now operates in over 80 schools across the US with nearly 9,000 students taking part in the 3DE experience.
- Unlike IB and STEM magnet programs, 3DE is new, and its innovative re-engineering of education is just beginning. It's exciting to be part of this new and evolving initiative.

3DE's central tenets are its six competencies (or essential skills) career professionals deem to be skills people need to find success in life in school and beyond school.

Self-direction

Inquisitive and resourceful students set priorities to execute ideas and achieve goals with integrity and initiative.

Effective Collaboration

By practicing cooperation, students learn how collaboration unites different perspectives and individual strengths to create more open, productive team experiences.

Cultural Agility

Students assess situations and norms to learn to read context clues, identify different perspectives, and adapt techniques that foster positive relationships and drive performance.

Critical and Analytical Thinking

Students break down complex problems through observation, reflection, and evaluation, and with their research, construct feasible, evidence-based conclusions.

Creativity and Innovation

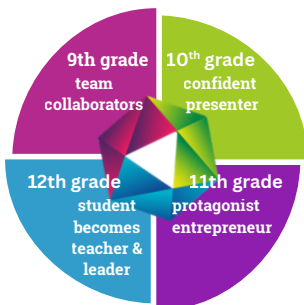

Using original ideas and approaches, students become comfortable with disrupting assumptions, taking calculated risks, and breaking patterns to improve and advance the present reality.

Engaging Communication

Students learn to articulate complex thoughts and information in a manner that connects with their audience to drive progress towards a desired outcome.

The Four Year 3DE Journey

First year students collaborate on case challenges to solve real business problems for real companies.

Second year students expand their knowledge of core competencies and learn new tools to aid them in addressing a fresh set of business case challenges.

Third year students become the protagonist in their story, embarking on a year-long entrepreneurial project and creating their own businesses, learning business development, finance, and marketing strategies.

Fourth year students become consultants, collaborating with a real client over a six month period. Through extensive research, ideation, and risk analysis, senior consultants solve problems and initiate change by learning the skills and behaviors of seasoned consultants.

3DE Digital Portfolio

Over 4 years, students create a digital portfolio to:

- record their work, projects, and achievements
- prove their skills and personal growth
- showcase their creativity
- demonstrate success and character beyond what a test score and transcript can show

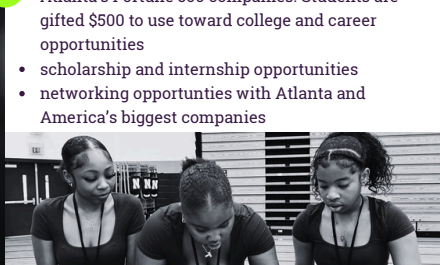

3DE Recognitions & Opportunities

- students compete in a national case competition in 9th and 10th grade, competing against 80 other schools across America
- 19 under 19 JA Hall of Fame:** 19 students recognized at JA's Hall of Fame attended by Atlanta's Fortune 500 companies. Students are gifted \$500 to use toward college and career opportunities
- scholarship and internship opportunities
- networking opportunities with Atlanta and America's biggest companies

3DE ROI

By taking 3DE, students earn

- magnet certification
- a 3DE magnet stole
- a 3DE diploma seal,
- 3DE Capstone on completion of the program, with a certificate and electronic badge to recognize their professional expertise and readiness to take on any career path

EDUCATION FOR EVERY
DIMENSION OF LIFE

APPLY THROUGH COSA

Students outside the Fulton County High School zone must apply through the County Schools COSA process. Students inside the FC school zone must apply through the NHS application process.

TRANSPORTATION

Transportation provided for students in the Northview school zone. Out of school zone students will have to provide their own transportation.
