Dear Parents/Guardians,

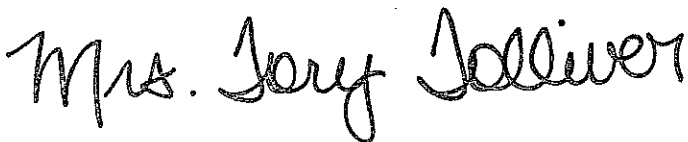

Argos Elementary School is a Title 1 Schoolwide building. The federal program is designed to support students' growth in mathematics and literacy through individualized and small group instruction. Areas of need are addressed at the students' levels and progress is monitored. The goal of the program is for students to demonstrate grade-level performance in math and literacy.

Students are identified through multi-criteria assessments such as IXL Diagnostic, Dibels (K-3), USNS Forefront Math Screener (K-2), and grade level assessments. Literacy and math groups are designed based on students' needs, and measurement tools are used to monitor progress.

During the year, all students participate in small groups. Literacy and math groups are fluid and frequently adjusted to best serve students. Multiple teachers may work with your child throughout the year to best meet the skill needs of your child. Some small groups work in the classrooms and other small groups move to other rooms within the school building. Our focus is setting and reaching goals to move students' literacy and math skills to the next level of achievement.

If you have questions about Title 1 or how your child is being supported, don't hesitate to ask your child's teacher or reach out to me. Together, we have the opportunity to make great strides in your child's success!

Sincerely,

Mrs. Tory Tolliver

Title 1 Teacher
