

BENJAMIN FRANKLIN INTERNATIONAL SCHOOL

Finding your way around campus is simple once you know how our 4-character room codes work. Every room code tells a story about where to go:

[Building] [Floor] [Room Number]

Here is a quick breakdown to help you decode your code:

First Character: The Building

- M – Main ("Orwell") Building
- E – Elementary Building
- S – Secondary Building
- C – Center for Creativity & Innovation (CCI)
- A – Auditorium Building

Second Character: The Floor

- 1, 2, or 3 – Upper Floors
- 0 – Ground Floor
- B – Basement (1 floor below ground)
- G – Gymnasium (CCI Building only, 2 floors below ground)

Last Two Digits: The Room Number

The specific classroom or office on that floor (e.g., 05, 12).

*Example:
Room C002 is in the Center for Creativity & Innovation, on the 0 (Ground) floor, room 2.*
