

ENFORCEMENT OF SCHOOL HEALTH ENTRANCE REQUIREMENTS

To address required immunizations and physical exams*, we have applied a “reasonableness approach” to enforcement of health enrollment requirements, which recognizes the lack of availability of immediate appointments with physicians or clinics as well as the need for students to be in school, balanced with the seriousness of the threat of once controlled diseases and viruses.

THE REASONABLENESS APPROACH: For any student who is not compliant with required vaccines and is not exempt:

School will notify parents whose child(ren) have not received all required vaccines and have not produced proof of an appointment to date, that their child(ren) is/are to remain home on the next school day, and may not return until proof of an appointment to receive their required vaccination(s) is secured and shared with the school.

A student who is not compliant with their vaccines would be confirmed to have:

- Parent / Guardian provision of proof of an appointment for their child to receive their vaccines for the child to attend classes / school (i.e. clinic, pediatrician, Health Department) and;
- Within 24 hours of the appointment, provide the school with the documentation that the required vaccines have been received.

Please contact [Kevin Kirst](#), Executive Director of Student Success and Support, or [Eileen Gomez](#), Coordinator of Nursing and Health Services if you have any questions about these requirements.

** Physical exams dated no more than 12 months prior are required for entering pre-school and elementary school for the first time. The above procedure also applies to physical exams.
