ADDENDUM 1

Project: Camera Installation

Date: September 15, 2026

Invitation for Bid No: 27-00-01

Instructions to Prospective Bidders:

This Addendum forms a part of the Contract Documents and modifies the original Bidding Documents and/or prior Addenda as noted below. All conditions, requirements, materials and workmanship are to be as described in the Contract Documents unless specifically stated otherwise. This Addendum consists of one (1) page.

Questions and Answers:

Q1: Regarding Camera Locations and CAT6 Scope:
Are new CAT6 cables required at all camera locations, or does the scope vary by location between new installations, camera replacements, and camera relocations? If the scope varies, please provide a breakdown identifying which locations will receive new cameras, which cameras are being replaced, and which cameras are being relocated.

A1: New camera locations will just have a number, camera moves will say “move”, camera replacement will say “replace”. Refer to the drawings for camera breakdown.

Q2: Regarding Electrical Scope:
Should we include an electrician in our estimate for any required electrical work, or will the electrical scope be provided by the owner/GC's electrician?

A2: There is no line voltage specifications for the camera installation.

Q3: Regarding Wire, Conduit, and Drawings:
Is there an estimated quantity of wire and conduit required for the project? If available, please provide the building plans/blueprints showing the camera locations and proposed cable pathways. This information would be helpful in accurately estimating the required materials and installation labor

A3: The use of conduit will be decided on the installation company. I do not have knowledge of pathways. An onsite visit would be necessary to see the building structure. Email pam.thoren@medford.k12.or.us to access drawings.
