Currently Lives In: Nebraska

Career/Profession: Registered Nurse (RN)

How Did Shepherd Effect You Positively: Playing basketball and being active in FFA helped me to learn how to work together for a bigger goal. And you didn't just play together on a team or compete in an event together, you did life with them because you were apart of something bigger than that. It was a smaller community so you knew, essentially, everybody on a deeper level (good, bad, and otherwise). I think going to school at Shepherd, helped me learn how to be a better member of a community. Everybody is going through something, and I do mean everybody. Going to a smaller school is something I want my kids to experience and that is because of my time at Shepherd!

Advice to current students: When I was in high school, I was always ready for the "next" thing. Whether that be college, a dream job, or a family. But looking back, I think I very easily let the days slip by and didn't enjoy them to the fullest. The days may go by slow, but the years fly by. High school itself, but my time at Shepherd in general, is a perfect example of that. Enjoy EVERY day.
