

Challenging the Youth of Today to be Leaders of Tomorrow

Injury Activity Policy

Please be advised that our goal at Reverend Brown School is to help our students be as safe and successful as possible both inside and outside the classroom. To that end, students recovering from injuries that require braces, splints, stitches and or casts as well as students recovering from surgery are not permitted to engage in physical activity during Gym or recess until they are cleared by their physician for full, unrestricted activity without any assistive devices. The physical limitations while healing increase the risk of further injury and some assistive devices risk potential injury to those around them. Recovering students will be with their class either at Gym or recess and can engage in sedentary activities (sidewalk chalk, board games, books, coloring) or walking with friends on the blacktop at the discretion of staff, if the injury permits. Students are NOT permitted on the play equipment or surrounding grounds. A physician's note is required for these students upon return to school after medical treatment or any ER visit, and a separate note clearing the student for all unrestricted activity is required prior to returning to full Gym class and recess.
