WELCOME TO PROJECT SEARCH

Project SEARCH is an international program model empowering young adults with disabilities to make a successful transition from school to adult life. Participants will learn relevant, marketable professional skills.

This unpaid internship is one school year in length and takes place entirely within the host business. The total workplace immersion facilitates the teaching and learning process through continuous feedback and the acquisition of employability and competitive work skills.

The goal for each intern upon completion of the program is competitive employment within the community.

We are deeply grateful for the opportunity that our son got to attend the West-MEC Project SEARCH Program. This program truly changes the lives of individuals with developmental disabilities and prepares them for long-term success in both employment and life.
