BOND | TAX IMPACT

Estimated Average Annual Tax Rate
Approximately $0.26 per $100 assessed valuation.

The District's most recent bond election was approved by voters in 2016 in the amount of $229 million. Those bond funds have been substantially utilized to address capital improvement priorities throughout the District. As remaining bond capacity has been committed, the District has evaluated future facility and operational capital needs that require voter authorization through a new bond program.

The bond would focus on key District priorities, including infrastructure improvements, life-cycle maintenance of existing facilities, instructional technology needs, safety and security upgrades, and replacement of aging buses.

How Bond Funds Would Be Invested

Learning Environment Improvements
Flexible learning spaces, classroom improvements, and campus modernization.

Technology Enhancements
Instructional technology, infrastructure and future-ready systems.

Site Lifecycle Renovations
Roofs, HVAC, building systems, and facility preservation.

School Safety & Security
Campus safety improvements and security enhancements.

Transportation
Replacement buses and support vehicles.

Administrative Capital Improvements
District operational support infrastructure.

*If a school facility is taken offline, bond investments at that site will be limited to those necessary to preserve and protect the building, allowing funds to support other identified capital needs across the District.
