

ELECTIVES

ADVANCED PLACEMENT PSYCHOLOGY

FULL YEAR - 1 CREDIT
GRADES 10,11,12

AP Psychology introduces students to the systematic and scientific study of human behavior and mental processes. The AP Psychology framework is aligned with content and skills used in college-level courses and recommended by the American Psychological Association (APA) Introductory Psychology Initiative. Students explore and apply psychological theories, key concepts, and phenomena associated with major units of study, including biological bases of behavior, cognition, development, learning, social psychology, personality, and mental and physical health. Throughout the course, students apply psychological concepts and employ psychological research methods and data interpretation to evaluate claims, consider evidence, and effectively communicate ideas. The course ends with an AP exam given by the college board. This is an elective course and is open to sophomores, juniors and seniors.
