FOR IMMEDIATE RELEASE:
Sunnyside Multilingual Students' Project Published by IN DNR Newsletter

Multilingual students at Sunnyside Intermediate School had their project on endangered species published by the Indiana Department of Natural Resources Division of Fish & Wildlife Newsletter.

The project, "Guess the Endangered Animal," highlights the 160 species in the state that are endangered. The students worked to raise awareness as well as share their knowledge.

"Throughout this project, our multilingual learners strengthened their reading, writing, speaking, and listening skills while exploring Indiana's ecosystems and endangered animals," say teachers Eliza Talamantes and Kaleigh Heshner, who worked with the students to develop the project. "By combining their language development with technology, they created mystery videos that allowed them to share their learning with an authentic audience beyond the classroom.

"It is especially meaningful to see our students use their growing language skills and knowledge to contribute to the real world and help others learn about Indiana's endangered animals. We are incredibly proud of their hard work, and we are excited to see their voices recognized by the Indiana Department of Natural Resources."
