

Assessment Dashboards- Overview

	AVG. SCORE	TEST RESULT	TEST SUBGROUP	DESCRIPTION
2	2235.0	Standard Not Met	Statistics and Probability	Grade 6 MATH - Statistics and Probability
9	2601.0	Standard Met	Number and Operations - Fractions	Grade 3 MATH - Number and Operations - Fractions
9	2505.0	Standard Met	Number and Operations in Base Ten	Grade 3 MATH - Number and Operations in Base Ten
9	2555.0	Standard Met	Operations and Algebraic Thinking	Grade 3 MATH - Operations and Algebraic Thinking
9	2424.0	Standard Nearly Met	Geometry	Grade 3 MATH - Geometry
9	2480.0	Standard Nearly Met	Measurement and Data	Grade 3 MATH - Measurement and Data
IAB	Mathematics	05/06/2019	2480.0	
IAB	Mathematics	04/18/2019	2486.0	
IAB	Mathematics	05/01/2019	2414.0	
IAB	Mathematics	05/02/2019	2621.0	
IAB	Mathematics	05/02/2019	2363.0	

Assessment Dashboards- Notes

- Assessment data is added to the dashboards through file uploads, it is not added through the nightly sync with Aeries
- Files are generally loaded at the conclusion of a testing window, but can be added at any time
- Assessment data takes about two weeks to be fully loaded to the dashboards
- Assessment data is only available for students who have data in the file (mostly relates to state assessment data and new students)

“Students View” Filter

Filter Data ▾ Tested in this School 2024-2025

District	>	Search ☐ Currently Enrolled in this School ☒ Tested in this School ☐ Cohort Annualized to this School

Grade	>	
Gender	>	
Ethnicity	>	
SE	>	
ELL	>	
Staff	>	
Course	>	
Student Group	>	
Students View	>	
Year	>	

- Tested in this School: Will most closely mirror the raw assessment file. The score is tied to the school from the assessment file and the student’s grade during the year in which they took the test. It will display all students regardless of whether they’re currently active.
- Currently Enrolled in this School: The score is tied to the student’s current school and grade. This should only display active students. It is the least likely to match the assessment file (especially for historical scores).
- Cohort Annualized to this School: Almost identical to “Tested in this School” except the score is tied to the student’s latest school for the year in which they tested. It will display all students regardless of whether they’re currently active. (The STATS team generally doesn’t use this filter)

Testing Year

Where there is an option to change or select multiple years, metric cards that show year over year data will not change.

State Data

- State assessment data available: CAASPP ELA and Math; CAST, CAA ELA, Math, and Science; Initial and Summative ELPAC; Initial and Summative Alternate ELPAC; IABs* (ELA, Math, Science, ELPAC); ICAs* (ELA, Math)
- All but the initial ELPAC and initial ALT ELPAC data come from the CERS file (the initial ELPACs come from a separate initial ELPAC file)
- CAA data is not available until September

*IAB and ICA ELA, Math, and Science data is available on the same dashboard that can be filtered to separate the assessments; Interim ELPAC is available in the ELPAC dashboards; these dashboards still require monitoring and will be updated or removed in the future

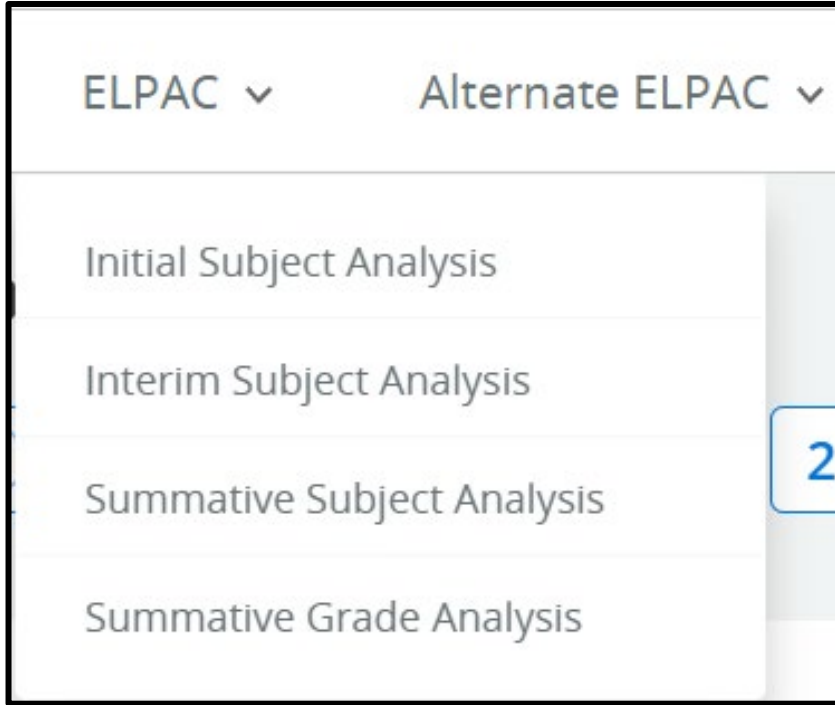

CAASPP, CAA, IAB/ICA Dashboards

- *Subject Analysis*- Year over year proficiency breakdowns; score distribution
- *Passing Analysis*- Year over year passing percentages by subject, school, grade, and race
- *Gainers, Stickers, and Sliders**- Compares ELA/Math proficiency change between consecutive years
- *Disproportionality*- Passing rates and distribution charts based on ethnicity
- *Math-ELA Plot**- Visualizes passing rate based on ethnicities' percentage of the overall student population

**Not available in IAB/ICA Dashboards*

ELPAC, Alternate ELPAC Dashboards

- *Initial Subject Analysis*- Year over year proficiency breakdown
- *Interim Subject Analysis**- Year over year proficiency breakdowns
- *Summative Subject Analysis*- Year over year proficiency breakdowns
- *Summative Grade Analysis*- Year over year proficiency breakdowns by grade level

**ELPAC only*

Student Test Score History

- Each student has their own assessment dashboard
- It includes any data point available for the student
- It will include data for students who were not enrolled for an assessment and do not return data when filtering for “tested in this school” if that score is available (generally only applies to state data)

Score Roster and Score Search (Advanced Tools)

Score Roster

- Good for comparing students' proficiency on assessments over time
- Can be sorted by rows and/or columns- requires an extract to be fine-tuned
- Best when looking at a specific grade level

2024-2025									
ALL							SPRING

							Below grade	On grade	On grade
							Above grade	Above grade	Above grade
Somewhat/Moderately	Level 4	Level 3	Somewhat/Moderately	Well Developed	Well Developed	Level 3			

Score Search

- Good for looking at assessment data for individual students or for a specific assessment in a year
- Students will have multiple rows of data (some may have dozens depending on how long they've been in the district)
- Two levels of filtering- through the general dashboard filter and on the list itself

ELL	SE	HOMELESS	TESTED GRA...	PRODUCT	TEST SUBJECT	TEST CLASS	DATE	AVG. SCORE	TEST RESULT	DESCRIPTION
