D'Evelyn is proud of its 30+ years of Liberal Arts excellence. Our belief is that all students should study an essential body of cultural knowledge, and that all students can succeed in an academically rigorous environment. D'Evelyn is committed to the premise that the mastery of the skills and knowledge acquired through the study of the core academic subjects is the foundation for all subsequent learning. Independent analytical reasoning, based on objective knowledge, is essential and is fostered throughout the D'Evelyn program.

Curricular Strengths

D'Evelyn Junior/Senior High School graduates complete an academically rigorous, seven-year liberal arts program from 6th to 12th grade. Courses are designed to expose students to rich content and high-level concepts with sequential continuity and interdisciplinary analyses.

- **English Program** stresses the foundational aspects of language and its application as represented in recognized great literature of the ages. Each student, upon graduation, will have studied literature, grammar, vocabulary, and composition in great depth. Students' literary knowledge will have come from a robust selection of full-length novels and plays, in addition to extensive study of poetry and short stories. That knowledge will be cemented and augmented by spoken and written exercises, providing the practice so essential to developing the skill of effective communication.
- **Social Studies Program** includes fact-based instruction in geography, history, political science, government and economics, and requires research-based term papers in grades 9 - 12.
- **Saxon Math Curriculum** supports student mastery of concepts and builds problem-solving skills through challenging, incremental development and practice.
- **Science Program** concentrates on the three pillars of science: Biology, Chemistry and Physics. Mastery of the general course is a prerequisite to taking AP Physics and AP Biology.
- **World Language Program** requires three years of Latin, French or Spanish. Students master vocabulary, grammar and gain a proficiency in reading, writing, and speaking in Spanish and French. All students complete a minimum three year study of a world language.
- **Elective Courses** include the fine arts, music, performing arts, physical education, and computer science as well as extended studies in the core academic disciplines.
