

Seeing Your Student's Progress

Step One

Log into your student's Beast Academy Online account. Click on the **Beast Profile** in the white circle on the top right.

Step Two

The Profile page shows your student's **data overview**. Review your student's activities on the left and check out the visual bar graph. For more information, click into the **Progress** and **Activity** tabs at the bottom of the screen.

Step Three

The **Progress** tab shows how your student is doing by **level**, **chapter**, and **lesson**. Use the yellow arrows to navigate up and down the page.

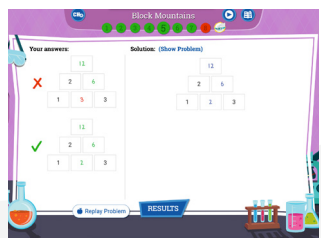

Step Four

The **Activity** tab shows your student's performance in a calendar. Click on the **Clock**, **Star**, and **XP** icons to learn about your student's **time**, **activities**, **progress**, and **play** in Beast Academy.

Step Five

Find the **Classroom** with your student to see their chapter path. Follow the pathway to see how your student did on individual lessons and problems. **Tip: Talk with your student regularly about their learning – it's helpful for both of you!**

Step Six

Click on individual lessons to see each problem set. When a student completes a problem, the circle turns green or red. Click on a **problem** to see your student's progress. **Tip: Beast Academy challenges students, so most students will not know every answer or play every lesson – and that's ok!**
