

Special Education Monthly Board Report Emmett School District August, 2026

Special Education Demographics:

As of August 4, 2026, the home page of our IEP platform (Edplan) shows that 381 students are receiving Special Education. We will pick up 3 Consents for Evaluation as we return in August, as well as process any move-ins or exits we will have enroll in the next few weeks.

Staff Openings:

- One Special Education Resource Room Teachers at EMS.
- Interviews for Special Education Paraprofessionals took place on August 4th, and we expect new hires to be processed soon.

Department Projects:

Special Education Office Update

The District Special Education Office is now complete and fully operational. Moving back into the space that was previously used as the Special Education Office—and most recently occupied by the Butte View office—has provided a much more functional and efficient workspace for our team.

This transition has allowed each of our School Psychologists to have a private office, greatly improving confidentiality for evaluations, meetings, and consultation. Nicole now has a larger office space that provides a comfortable and professional environment for meetings with parents, staff, and community partners. Paige has also settled into her new workspace and is making excellent use of the dedicated area to support the many responsibilities of her position.

Overall, the move will have a positive impact on our ability to serve students, families, and staff while providing a more collaborative and confidential working environment for the Special Education team.
