Annual Integrated Pest Management Notice For School Year 2026 – 2027

September 2026

Dear Parent, Guardian, and/or Staff Member:

This notice is being distributed to comply with the New Jersey School Integrated Pest Management Act. The Mount Arlington Public School District has adopted an Integrated Pest Management (IPM) Policy and has implemented an IPM Plan to comply with this law. IPM is a holistic, preventive approach to managing pests that is explained further in the school's IPM Policy included with this notice.

All schools in New Jersey are required to have an Integrated Pest Management Coordinator (IPM Coordinator) to oversee all activities related to IPM and pesticide use at the school.

The IPM Coordinator for the Mount Arlington Public School District is:

Miques Valle, Facilities Manager
Business Phone Number: 973-770-7140
Business Address: 1 Altenbrand Ave, Mount Arlington, NJ 07856

The IPM Coordinator maintains the pesticide product label, and the Material Safety Data Sheet (MSDS) (when one is available), of each pesticide product that may be used on school property. These documents are available for review. The IPM Coordinator is also available to parents, guardians, and staff members for information and to discuss IPM activities and pesticide use at the school.

Although it has been and continues to be the general practice of the Mount Arlington Public School District, to eliminate the use of pesticides in school buildings or on school grounds, the district may use pesticides to control pests as part of its pest management plan.

As part of a school pest management plan, Mount Arlington Public School may use pesticides to control pests. The United States Environmental Protection Agency (EPA) and the New Jersey Department of Environmental Protection (DEP) register pesticides to determine that the use of a pesticide in accordance with instructions printed on the label does not pose an unreasonable risk to human health and the environment. Nevertheless, the EPA and the DEP cannot guarantee that registered pesticides do not pose any risk to human health, thus unnecessary exposure to pesticides should be avoided. The EPA has issued the statement that where possible, persons who are potentially sensitive, such as pregnant women, infants and children, should avoid unnecessary pesticide exposure. The following pesticides have been used at these locations in the past 12 months:

Trade Name
Contrac Blox-9 oz.
Eco.pco.wpx-.25 oz
Masterline-45 gal

EPA Registration #
12455-79
67425-25
73748-7

Dr. Jessica Neu
