

# Observer

## Account Setup on the App

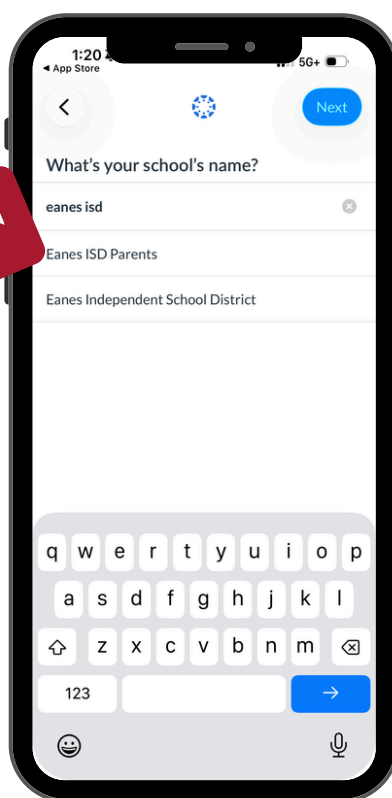

Our Canvas Observer accounts are now live! That means you can log in with your own credentials and see a read-only view of what your student sees in Canvas.

An account has been **automatically created for you** based on your Skyward Family Access registration and paired with your student(s). All you need to do is reset your password by following these steps.

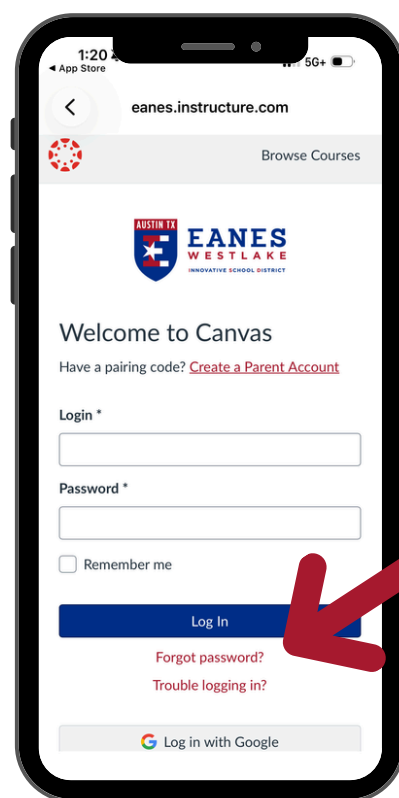

Download the  
**Canvas Parent** App

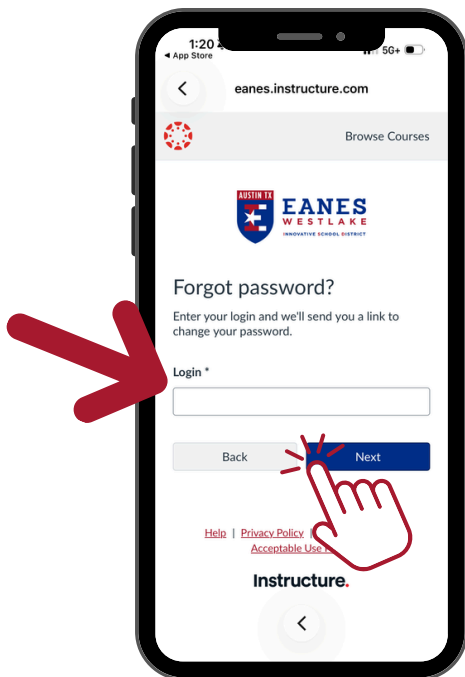

**1** Click **"Find School"**

**2** Search **"Eanes"** and select **"Eanes ISD Parents"**

**3** Click **"Forgot Password"**

4

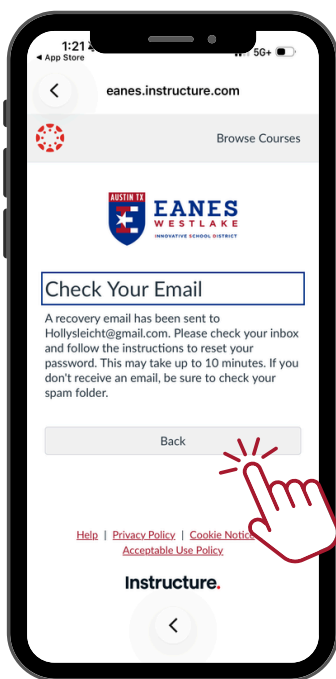

In the Login field, enter the email address you registered in Skyward Family Access and click **Next**.

5

Check your email for a password reset message from Canvas. **Follow the link in that message to create your Canvas password.**

Note: this does not change your password for Skyward.

6

Head back to the app and click the **Back** button or return to the same Canvas login page and enter your new credentials.

If your student is already connected through Skyward, there is **nothing else you need to do** to pair your account.

If a student you should be able to observe does not appear, please email [lsaccount@eanesisd.net](mailto:lsaccount@eanesisd.net).
