

Multnomah Education Service District

Annual Professional Learning Report 2025-26 School Year

EDUCATE • INSPIRE • EMPOWER

MESD creates a high-quality learning experience for all by providing professional learning for teachers, instructional coaches, paraeducators, and administrators. This support is provided through regional networks, communities of practice, book studies, workshops, on-site training, consultation and coaching.

This annual report details the professional learning opportunities offered by MESD in the 2025-26 school year and describes the participation of our component districts.

Numbers at a Glance

649

Total hours of professional learning offered

15,365

Total hours of engaged learning by participants

8

Total number of school districts served

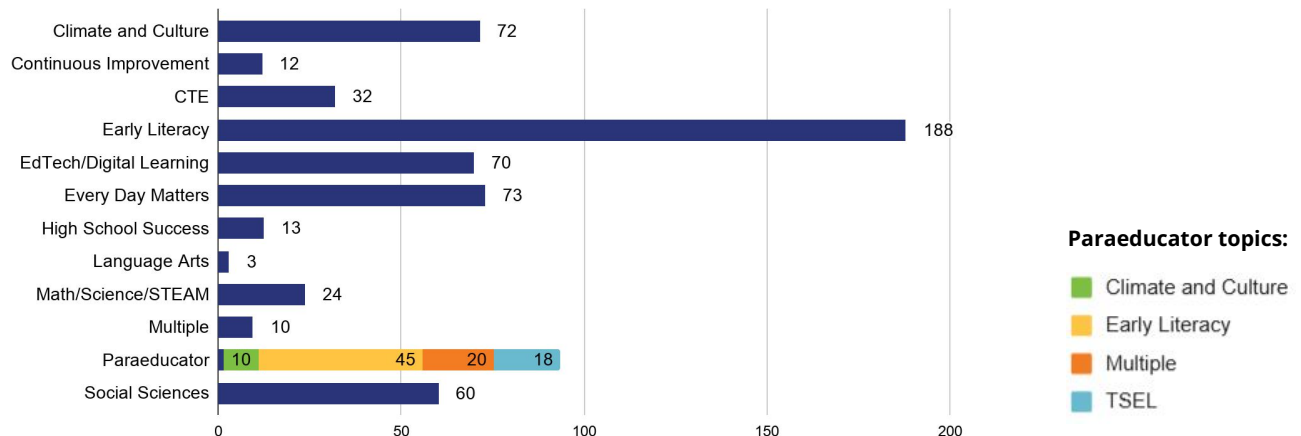

75

* Total number of unique learning opportunities

* unique learning opportunities may include 1 or more individual sessions

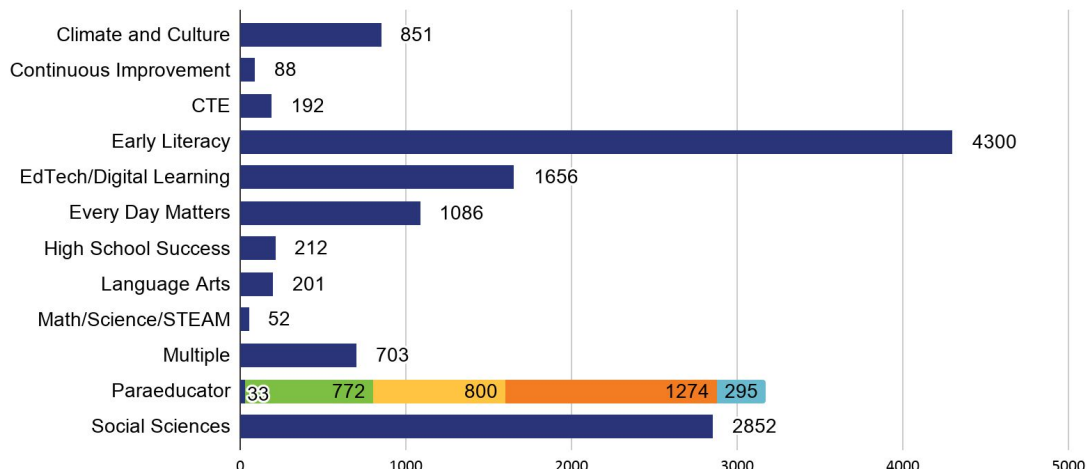

Total Professional Learning Hours Offered By Topic

649 Total Hours Offered

Total Hours of Engaged Learning By Topic

15,365 Total Hours Of Engaged Learning

Note: Hours of engaged learning were calculated by multiplying the number of participants by the length of the professional learning opportunity

Co-Creating the Future: A Year of Collaborative AI Integration and Student Advocacy

The 2025-26 school year marked a turning point in how our region approached artificial intelligence. Rather than supporting isolated experimentation, we transitioned to helping districts build the systems, partnerships, and capacity needed for responsible, equity-centered AI implementation. Through our **AI Steering Committee workshops**, cross-functional district teams used shared readiness rubrics to examine their existing frameworks, align priorities, and develop 12-month implementation roadmaps tailored to their local contexts. As concerns about synthetic media emerged from this work, we partnered with national expert Evan Harris to provide district leaders with practical guidance and crisis response tools to address deepfake bullying, voice-cloning scams, and other emerging risks.

While administrators were building safety frameworks, the **year-long RAIN (Regional AI Network) Explorers Cohort**, delivered in partnership with MCREN and Clackamas ESD, brought together 50 educators from 16 districts to develop ethical, instructionally meaningful AI tools and practices through capstone projects tied directly to their professional roles.

This momentum culminated at our third annual **AI Empowered EDU Conference**, where more than 350 educators, students, and leaders gathered to explore the theme, Amplifying Human Intelligence & Student Voice. Learn more about the conference on page 6, and [click here](#) to watch our Student Voices video.

Educators engage in dialogue during a workshop session at the AI Empowered EDU Conference

In Partnership with MCREN

Several of the initiatives featured in this report (the Regional AI Network, Social Sciences for a Better World, and the Principal Impact Exchange) were developed in partnership with the **Multnomah-Clackamas Regional Educator Network (MCREN)**. Together, we're strengthening educator practice, building regional capacity, and advancing equitable outcomes through collaborative learning and leadership.

Expanding Support for Charter Schools

A new priority for the 2025–26 school year was strengthening our engagement with charter schools, which are often disconnected from regional professional learning and school improvement networks. We began by hosting a Charter School Listening Session, led by MESD's Integrated Guidance Liaison, to better understand each school's professional learning needs, support Integrated Guidance goals, and identify opportunities for ongoing collaboration. A second listening session, combined with personalized outreach to every charter school, helped build stronger relationships and increase participation in our Integrated Guidance supports. This work laid the foundation for deeper partnership and more equitable access to regional learning opportunities.

"I gained new perspectives on deepening engagement, and have powerful examples to bring back to the team."

- Charter School Leader,
Integrated Guidance Series Participant

District-Wide Professional Learning Days

"I learned structured ways to integrate TSEL into the work I'm already doing-- now I can apply my learning with intentionality"
-Gresham High School Participant

During the 2025-26 school year, MESD expanded its partnerships with local districts by bringing customized professional learning directly into district-wide PD days. In collaboration with Parkrose, Corbett, Gresham High School, and Reynolds School District, our School Improvement team worked with district leaders to design and deliver learning experiences aligned with local priorities. Across these partnerships, MESD specialists facilitated sessions on artificial intelligence in education, relationship-based strategies for supporting attendance, data-based decision making, culturally responsive instructional practices, TSEL integration and more for teachers and paraeducators. By embedding regional support into district PD days, we provided practical, job-embedded learning while strengthening district partnerships and educator capacity.

1,456 Hours of Engaged Learning through District-Wide Professional Learning Days

Regional Networks for Professional Learning

In the 2025-26 school year, MESD staff convened 22 regional networks across 8 content areas. These networks provided a collaborative space for educators to discuss timely topics, build relationships, share promising practices across districts, and engage with guest speakers. Examples of networks offered included:

MESD's Brad Parker alongside speakers from Social Sciences for a Better World Year 2

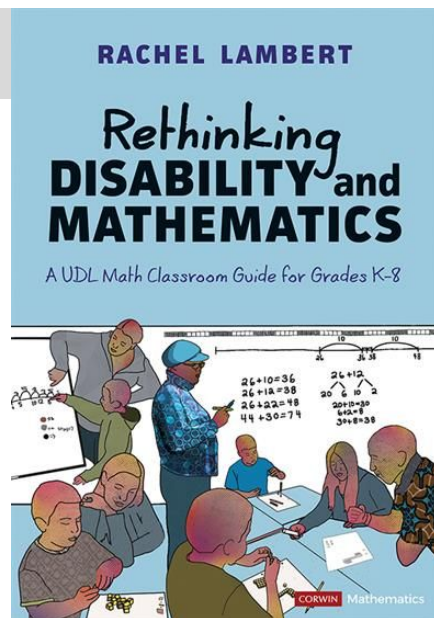

- 9th Grade on Track Network
- Attendance Alliance Network
- Oregon Science Leaders
- Regional AI Network: Explorers Cohort
- Social Science for a Better World
- Transformative Social Emotional Learning (TSEL) Regional Support Network

4,649 Hours of Engaged Learning through Regional Networks

2025-26 Network Spotlight:

Math Coaching and Leadership Network

This year, the Math Coaching and Leadership Network, a community of practice led by math specialists from Multnomah, Clackamas, and Lane ESDs, focused on supporting students with disabilities in math classrooms. Monthly meetings brought together math and special education colleagues to discuss the book 'Rethinking Disabilities and Mathematics', exploring how to create more inclusive math classrooms through Universal Design for Learning (UDL), asset-based practices, and new approaches to IEP goal development.

Author Dr. Rachel Lambert joined the network to answer participant questions and share her research on using math games as an intervention strategy. Building on this learning, Multnomah ESD and the Portland Metro STEM Partnership will co-lead a K-5 action research pilot next year to explore how math games can strengthen math fluency, social-emotional learning, and positive math identity.

Workshops and Limited Run Series

Workshops and professional learning series provide educators with opportunities to engage with educational leaders, deepen their understanding of research-based and equity-centered practices, and strengthen instructional skills.

During the 2025–26 school year, MESD offered a wide range of workshops and series. The examples below highlight two such initiatives that supported early literacy instruction across the region.

Regional Literacy Capacity Building: Through its Comprehensive Literacy State Development (CCPL) grant in partnership with CORE Learning, MESD expanded K-5 literacy support across the region through dyslexia training, customized coaching, and literacy leadership development. Educators from six component districts participated in CORE's 18-week Online Language and Literacy Academy, an ODE-approved dyslexia training. Three districts partnered with CORE to implement customized coaching focused on students who are emerging bilinguals, dual-language programs, and early literacy initiatives. MESD also hosted a two-day Leadership for Literacy Institute for school leadership teams from districts and charter schools across the region. Building on this momentum, ODE has approved the CCPL grant to expand into grades 6-12 beginning in 2026-27, extending high-quality literacy professional learning and support to more educators and students.

Science of Writing Series: Literacy leaders from across the region participated in a four-part Science of Writing series that used content from Oregon's Tribal History/Shared History lessons. The series expanded into a districtwide K–5 professional learning day in Gresham-Barlow School District, integrating the Science of Writing with new social science standards. Planned collaboratively with district coaches, special education team, dual-language and English-language development specialists to ensure the professional learning met the needs of all students, but especially students who are emerging bilinguals and students with disabilities. This work was later shared with more than 200 educators at the Oregon Response to Instruction and Intervention (ORTII) Annual Conference.

Special Education teacher on Special Assignment, Jessica Morgan, works with students in a Learning Essentials classroom. Jessica participated in MESD's Science of Writing series and implemented what she learned with students.

6,162 Hours of Engaged Learning through Workshops and Series

Annual Paraeducator Summer Conference

The 2025 Paraeducator Summer Conference offered an engaging professional learning experience for paraprofessionals across our region. The conference spanned two weeks with four virtual days and one in-person day. Session topics ranged from trauma-informed education and restorative practices to multilingual literacy instruction, Transformative Social Emotional Learning, and innovative tools like AI in education. Feedback highlighted how much participants valued the engaging presenters, meaningful peer collaboration, and practical resources they could immediately apply in their classrooms.

AI Empowered Edu Conference

MESD partnered with Northwest Regional ESD, Clackamas ESD, and the University of Portland to host the third annual AI Empowered EDU Conference, bringing together more than 350 educators for a day of learning, collaboration, and innovation. Centered on the theme ***Amplifying Human Intelligence & Student Voice***, the conference featured more than 40 breakout sessions exploring the responsible and meaningful use of artificial intelligence in education. A highlight of the day was the active involvement of students, who delivered keynote presentations and led breakout sessions, sharing authentic perspectives on topics including digital safety, AI, and the future of learning. Their leadership reinforced the importance of partnering with students to shape the future of AI in education. Watch the [highlight video](#) to experience the energy of the day.

1,708 Hours of Engaged Learning through Conferences

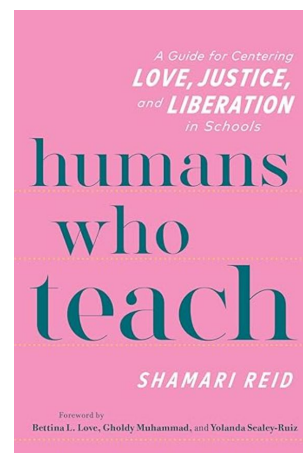

Students co-present a workshop on co-designing AI policy with students at the AI Empowered Edu Conference.

2025-26 Book Studies

Professional book studies provide educators with opportunities to connect across districts, engage with current research, and apply new ideas to their practice.

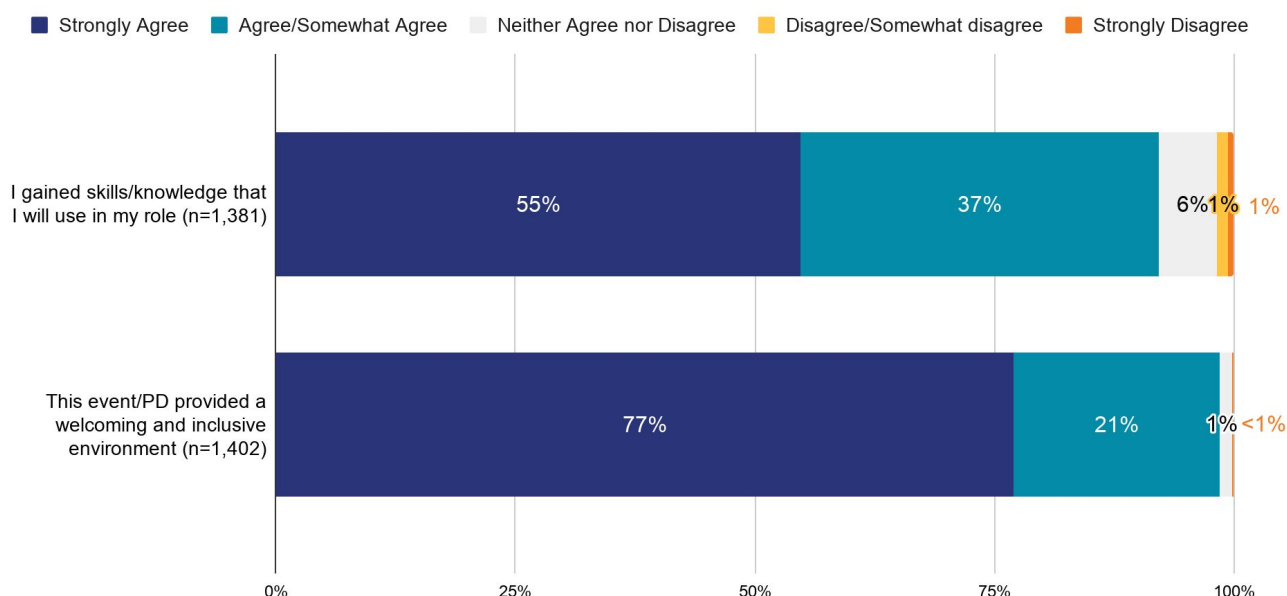

During the 2025-26 school year, MESD hosted a regional book study of ***humans who teach*** by Dr. Shamari Reid, exploring how authentic relationships, educator identity, and belonging contribute to thriving learning communities.

12 Hours of Engaged Learning through Book Studies

Feedback from Participants

More than 1,300 participants completed end-of-session surveys for 93 individual professional learning opportunities

"There are numerous resources and ideas that I am taking away to help implement in my building."
-Leadership for Literacy Participant

"I appreciate the way the workshop brought staff together and opened up conversation on difficult topics."
-School Based Climate & Culture PD Participant

"I thought that the structure was very engaging. I enjoyed connecting with peers and hearing them participate throughout the day and share their experiences."
-Attendance Alliance Network Participant

Paraeducator and Preschool for All Coaching

MESD staff provide coaching through our Preschool for All and Paraeducator Professional Learning programs.

Preschool for All coaches Preschool for All coaches partner closely with early learning educators across Multnomah County school districts to support high-quality early learning through relationship-based, individualized coaching. Through collaborative goal setting, reflective practice, classroom-based support, and evidence-based coaching strategies, coaches help educators strengthen instructional practices, build professional efficacy, and create inclusive, culturally responsive learning environments. By fostering continuous improvement and professional growth, coaching enhances program quality and advances MESD and Preschool for All's shared commitment to equity, inclusion, and positive outcomes for children and families.

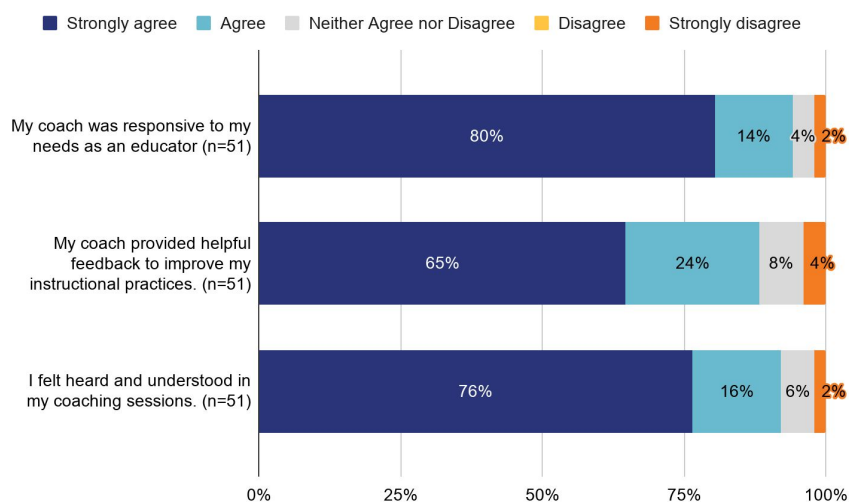

Paraeducator early literacy coaching supports Instructional Assistants (IAs) who are also participating in monthly Science of Reading communities of practice. Coaching sessions and cycles are tailored to individuals and include: instructional practice demonstrations, side-by-side teaching, and observations with specific feedback. There is a strong emphasis on highlighting the expertise each IA already possesses and the positive impact this has on the many students they interact with every day.

"The MESD team has been paramount in our district implementation of IA PL and coaching--especially [the early literacy coach] and their consistent Science of Reading cohorts and coaching cycles at the majority of our elementary schools"
- School/District Leader Feedback Survey

Paraeducator and Preschool for All Coaching

MESD staff provide coaching through our Preschool for All and Paraeducator Professional Learning programs. Below is a summary of feedback from 2025-26 school year participants.

"The feeling of community & togetherness that [my coach] brought to our building has been amazing. Their willingness to help IA's in anything asked of them in working with small groups & learning club kids."

- Paraeducator Coaching Participant

"My coach helped me keep perspective about what matters most in early childhood. I applied lots of techniques to support children work through difficult emotions."

- Preschool for All Coaching Participant

Learn about Professional Learning Offerings for 2026-27!

PDNetworks is a one-stop hub where educators can browse workshops, networks and other professional learning offerings designed to fit their goals.

Educators can explore what's available and discover opportunities in the region by [creating an account at this link](#). [Watch this short video tutorial](#) to get started today.
