What's New?

Another exciting stretch of progress on the project! Room 117 is looking more finished by the day, with the new carpet flooring, doors, windows, and fresh paint all complete. The wrestling room has also entered its next phase with selective demolition underway, making way for the work ahead. On the structural side, CMU Phases 1–12 are officially complete, marking another major milestone as the building continues to take shape and the spaces start to become easier to visualize. There's even more happening as we move into the next phase! Crews are pushing forward to finish the Area A lobby steel structure, with precast floors coming up next. The Area A lobby and gym storage roof joists will also be installed, while masonry crews work toward completing the remaining CMU walls in Phases 13–16. The upcoming precast topping slab pour will be another big step forward and will continue turning the structure into the finished spaces everyone has been looking forward to. The progress is really starting to show, and we're excited to keep the momentum going as this project continues to come together!

Wrestling Room Painting

Window Blocking Installation

Room 117 Flooring Installation

DID YOU KNOW?

Steel is the most recycled material on earth. Steel can be recycled for up to 150 years after it is first produced. When you purchase steel, it is always recycled.
