SCHOOL-to-HOME CONNECTIONS

Chapter 7

Addition

Dear Family,

In this chapter, your child will learn about addition. Skills your child will practice include:

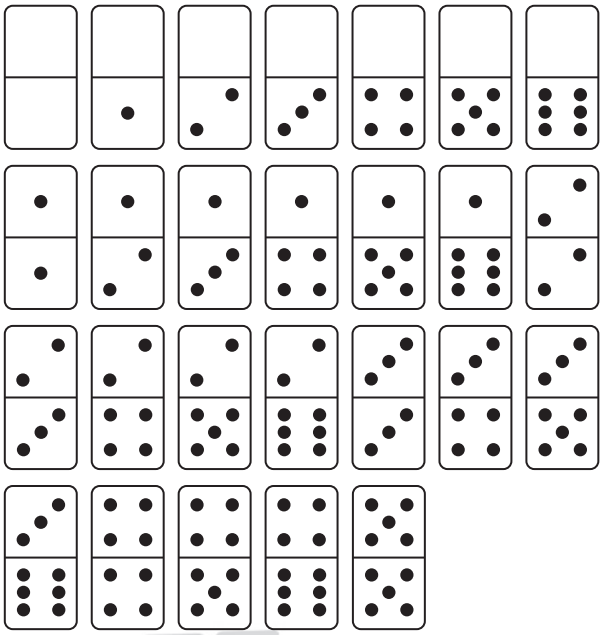

- adding by putting together and adding to
- using addition facts to 5 to add
- counting on to add numbers to 10
- writing and solving addition sentences

Math Activities

At the end of this chapter, you may want to carry out these activities with your child. These activities will help to support your child as he or she adds within 10.

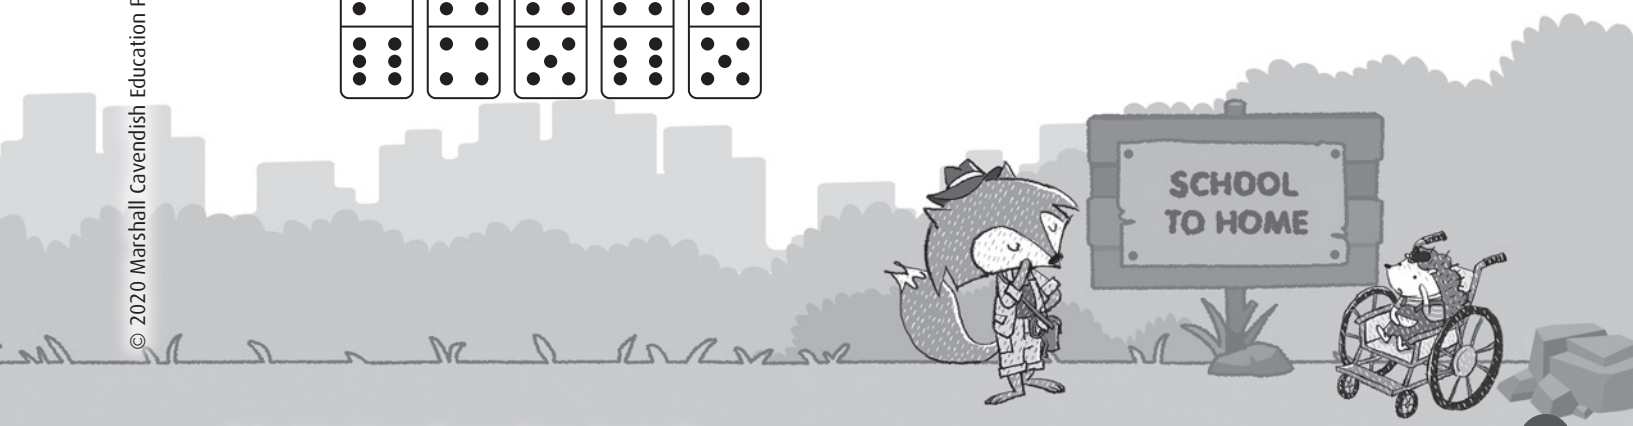

Activity 1

- Gather dominoes with number parts that add to 10 or less or go online to print free printable dominoes as shown below and cut them out.
- Put the dominoes in a paper bag.
- Pick a domino, count the dots on each side, and add to find the sum.
- Return the domino to the bag before your child leads the next round.

Math Talk

Gather 10 identical objects and a number cube. Take 1 to 4 objects and count aloud. Roll the number cube and take the corresponding number of objects. Ask your child to count on to add. Encourage your child to use the words **put together** and **add to**. Return objects before the next round.
