

September 2, 2026

Dear Parents, Guardians, and Staff of Regional School District 15,

The administration would like to notify you that radon testing will be conducted at Regional School District 15 Schools between November 2nd & November 6th, 2026. According to Connecticut General Statute Sec. 10-220(d), all public schools must inspect and evaluate the indoor air quality in school buildings every three years. The required inspection and re-evaluation of indoor air quality includes evaluation of radon gas.

The purpose of the re-evaluation of indoor air quality is to determine if air quality has changed in the past three years.

EnviroMed Services, Inc. will conduct the three-year radon re-evaluation of the school building. To re-evaluate buildings for radon in air, a limited number of locations are selected. Small test devices containing charcoal will be placed in ten percent of the occupied rooms that are in contact with the ground. Radon test devices are safe and do not cause any adverse health effects. These devices will be left in place for two to three school days.

The school administration will keep radon test reports on file for review when all testing has been completed. If elevated levels of radon are found, steps will be taken to reduce radon levels below the United States Environmental Protection Agency action level of 4.0 pCi/L.

If you have any concerns regarding radon testing, please feel free to contact the State of Connecticut Department of Public Health Radon Program at (860) 509-7300.

Sincerely,

Joseph Martino
Director of Finance & Operations
