Student Retention

Saint Constantine College believes that the first year to second year retention rate of first-time, full-time freshmen is one of the indicators of undergraduate students' successful adjustment to college life. We also track the fall-to-spring retention rate as a predictor of the fall-to-fall retention rate. Saint Constantine College strives to have a high retention rate that stems from our commitment to excellence in the admissions process.

The College tracks retention by various subgroups. In each category below, the goal will be given by subgroup along with historical performance on these metrics.
