

McClymonds High School Measure Y MODERNIZATION

September 2026 Project Update

We are building a NEW and IMPROVED McClymonds High School!

Budget \$108 Million

(Additional \$3M was allocated for the Turf and Track Project)

Estimated Completion February 2029

Project Features

- State-of-the-art renovated classrooms for enhanced and flexible student learning opportunities
- Cutting-edge engineering labs to provide students with modern technology and tools
- Enhanced security systems across campus to increase student safety
- Upgraded plumbing and electrical systems to create a more reliable campus experience and minimize maintenance disruptions
- New grandstand, scoreboard, concessions, and restroom to support our world-class football program
- New bleachers in the William "Bill" Felton Russell gymnasium to complete the renovations
- Upgraded heating, ventilation, air conditioning, and climate-controlled classrooms for improved air quality
- Revitalized garden and Plaza of Peace
- Modernized cafeteria, locker rooms, dance, and weight rooms
- New furniture and reconfigured layouts for better collaboration and a variety of teaching and learning styles
- Improved ADA accessibility...**and more!**

School Contacts

- **CoPrincipals:** Darren Avent and Kevin Taylor
- **Assistant Principal:** Angelina Gilyard-Shyne
- **Community School Manager (Mack Alum):** Brian McGhee

Project Information

- **Construction Manager:** Elena Comrie
- **Project Engineer:** Chastity Henderson
- **Community Outreach Partner:** Ray Bermudez
- **Bridging Architect:** Perkins Eastman
- **Design Architect:** HKIT Architects
- **General Contractor:** Alten Construction

September 2026 Project Update

We are building a NEW and IMPROVED McClymonds High School!

✓ Modernization Project Updates

A groundbreaking ceremony was held on June 12th to mark the start of construction on the modernization project. Alumni, school community, city, and District leadership gathered to celebrate the momentous occasion.

Recent construction activities include:

- Continuing to coordinate with environmental and regulatory agencies.
- Ongoing interior demolition and abatement.
- Drilling of micro piles for structural work.
- Trenching to install conduit and site utilities.
- Reframing of the lobby of the 1st floor, doorways, and curbs.
- Coordinating access to the school campus and athletic facilities, including the swimming pool, basketball, and football areas.

Student, staff, and community safety remain a priority throughout construction. Construction areas are separated from campus activity with barricades, fencing, and clear signage, while material stockpiles are watered and covered to minimize dust.
