

My name is Casey Peterson and I teach Science as part of this year's 5th grade team. This is my second year teaching this subject and grade level, and my ninth-year teaching in the district.

I grew up in Utah but received my teaching degree from the University of Alaska Anchorage. I have a Master's in Education. I am passionate about education both for the students and for myself; I take online courses to help improve my own teaching as well as further some interest I have, like art. My wife and I have three boys, and we love to hike, camp, draw, play soccer, board game, and read together. We are happy to be a part of the Coquille Community. I feel privileged to raise my kids among the amazing kids at CVE. I look forward to exploring Science with your students!
