September 24, 2026

Dear Families and Community Members,

On behalf of Wilson County Schools, I encourage you to review our district's 2025-2026 North Carolina School Report Card. The report card includes data about the district as a whole and also highlights our individual schools.

Wilson County Schools continued to experience gains in proficiency and growth for the 2025-2026 school year. The district is now ranked 36th out of 115 districts in the state in overall grade-level proficiency. For the second consecutive year, all of our middle schools increased in grade-level proficiency. We are just 3 percentage points away from being one of the Top 20 performing districts in the state.

Students scored at 60.2% proficient overall, an increase of 3.8% compared to the previous year. For reference, the top-performing district in the state scored at 73.8%. Our growth scores also indicate the tremendous impact teachers are having on student success. Growth is a measure based on achieving one year's worth of learning for students. Seventeen out of 24 schools met or exceeded growth this year.

While we are always excited about our great results, I want to emphasize that success for our students is represented by more than just test scores. We are committed to helping our students realize their full potential. The mission of Wilson County Schools is to provide an educational environment which creates success for all students through the community working together. I want to celebrate the dedication and hard work of every teacher, staff member, administrator, and district leader who went above and beyond for students. I also want to thank our students and families for their commitment to continued success. This kind of sustained achievement is not easy, and it reflects the shared commitment to student success of our entire Wilson County Schools Family. Our district has made great progress, and I know it will continue.

Sincerely,

Benjamin T. Williams, Ed.D.
Superintendent
