

2027-2028 & 2028-2029 Bell Schedule Adjustments

Charlotte-Mecklenburg Schools Transportation recommends the following adjustments to increase efficiency and improve service to CMS students, families and staff.

These recommended changes would be implemented during the 2026-2027 school year.

Together, they support more efficient bus routing and optimal bus pairings while helping minimize the impact of additional programs across the district. In some cases, the changes also reduce the number of buses required. Although overall program growth will still increase transportation needs, these adjustments help maximize efficiency and lessen the overall impact on district resources.
