

Medical Clearances

The school will require written medical clearance upon return to school for certain conditions such as; injuries, significant wounds, infections, post-procedures/surgeries, rashes and unexplained redness to the eye(s). This also relates to known or suspected such conditions.

The reason for this is to ensure that proper medical care was provided, and that the treating physicians give their best medical judgement that it is safe for the child to return to school. The physician should also recommend if any modifications are required for the child to maintain their safety while attending school.

In collaboration with the building Principal, we will make the determination if the modifications can be made with the resources available and still maintain safety for all students and staff.

Thank you for your understanding and cooperation in these safety measures.

Best regards,

Caroline Bormann BSN RN
