September 8, 2026

To Parent, Teacher & Employee Organizations:

The Asbestos Hazard Emergency Response Act (AHERA) requires that all educational facilities be inspected for asbestos – containing materials and develop a remedial plan of action on or before May 9, 1989. In addition, each educational facility shall reassess all identified asbestos – containing materials or materials assumed to be asbestos, at least once every six months (Periodic Surveillance) and re-inspect those facilities every three years (Tri-annual Re-inspection).

The Springfield Twp. Board of Education is in compliance with these inspection requirements. The most recent Tri-annual re-inspection was performed in September 2024, with the next one scheduled for September of 2027. "Periodic Surveillance" inspections are conducted every March and September unless a Tri-annual Re-inspection is due. The most recent "Periodic Surveillance" was performed in March 2026, with the next one scheduled for this month, September 2026.

Following each inspection, appropriate remedial actions are recommended to the Board of Education by an accredited Asbestos Management Planner. The remedial plans of action and recommended schedules for implementation (Asbestos Management Plans) are available for review at the Springfield Twp. Board of Education Administrative Office, as well as in each school office.

This past year, numerous asbestos abatement efforts were performed throughout the district as part of ongoing renovations and/or upgrades. Asbestos containing surfacing materials were removed from two restrooms at James Caldwell School, an extensive non-friable removal of floor tile was undertaken at Jonathan Dayton High School (JDHS), and non-friable caulk/glaze was removed from certain windows/doors at JDHS and Edward Walton School. Lastly, there was non-friable pipe with intact insulation abated from mechanical areas at JDHS, Florence Gaudineer Middle School, and Thelma Sandmeier School. These projects were performed in accordance with all applicable Federal and State rules, regulations, and guidelines. The details of the projects can be viewed within the Asbestos Management Plan.

We will continue to keep you informed of our AHERA compliance.

Respectfully Yours,
Cathy DiNardo
