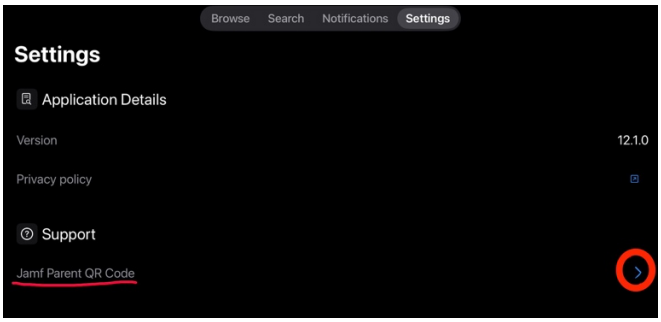
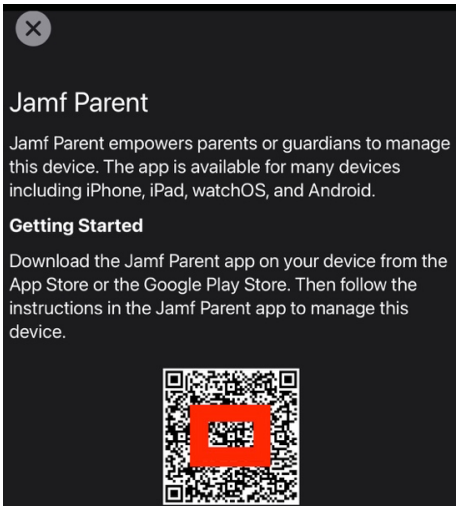
Jamf Parent

Jamf Parent is a free app that allows parents to manage limits on school-owned, Jamf-managed iPads outside of school hours. Download Jamf Parent from the App Store or Google Play.

Getting Started

1. On your child's iPad, open **Self Service+**.
2. Tap **Settings**, then under **Support**, tap **Jamf Parent QR code**. A QR code will appear.





3. On your device, open **Jamf Parent** and tap **Get Started**.
4. Tap **Scan QR Code** and scan the QR code on your child's iPad.
5. Tap **Confirm** to pair the devices.

To add another child, tap the parent and child icon in the upper-left corner, then tap **Add child** and scan the QR code on the child's iPad.

Note: The same QR code can be scanned by multiple parent devices if more than one parent needs to manage the same iPad.

What Parents Can Do

- **Manage apps:** Allow or block specific apps
- **Manage features:** Turn off features such as the camera, when permitted by the school
- **Set time limits:** Schedule restrictions for specific times or activities
- **Check device status:** See which device is linked and when it last checked in
