SCHOOL-to-HOME CONNECTIONS

Chapter 1

Numbers to 1,000

Dear Family,

In this chapter, your child will count to 1,000. Skills your child will practice include:

- counting on by 1s, 10s, and 100s to 1,000
- using base-ten blocks and place-value charts to read, write, and represent numbers to 1,000
- reading and writing numbers to 1,000 in expanded form, standard form, and word form
- comparing and ordering 3-digit numbers

Math Practice

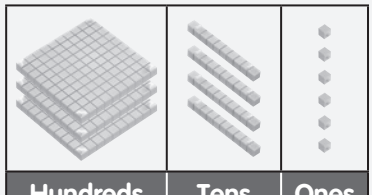

At the end of this chapter, you may want to carry out this activity with your child. This activity will help to strengthen your child's understanding of place value. Take turns playing. Lead the first round to show your child how to play.

Activity

- Gather a pencil, paper, and a set of number cards from 1 to 9.
- Make a place-value chart as shown on the next page. Make sure the chart is large enough to contain the number cards.
- Shuffle the cards and put one card in each empty space.
- Write the number that the cards represent in each row on the paper.
- Order all three numbers from least to greatest.
- Return and reshuffle the cards before your child leads the next round.

Math Talk

The following place-value chart uses base-ten blocks and hundreds, tens, and ones to represent a number. Ask your child to explain the following chart and how the value of each digit in a number depends on its place.

Hundreds	Tens	Ones
3	4	6
