Re: ANNUAL ASBESTOS NOTIFICATION LETTER 2026-2027

Please be advised that an AHERA Asbestos Inspection Report and Management Plan have been developed for each school and building in the Paterson Public School District as required by law.

As per the United States Environmental Protection Agency's Asbestos Hazard Emergency Response Act (AHERA 40 CFR Part 763), the lead administrator or designee (the chief custodian) at each building is responsible for maintaining a copy of the Asbestos Management Plan. The plan is required to be available for review at each school during normal school hours and is also on file at the district's facilities department located at 200 Sheridan Avenue.

All vendors and District employees performing work that may disturb asbestos-containing building materials are required to review the applicable Asbestos Management Plan before beginning work. For additional information or assistance regarding this matter, please contact Niel Mapp, at 973-321-0912.

As required by the United States Environmental Protection Agency, each school is reinspected every three years by properly trained and accredited individuals. Additionally, we conduct periodic surveillance every six months.

Since the last annual notification, no asbestos-containing material has been removed from any school location.

This notification is being provided for your information and records and is intended to comply with the requirements of AHERA 40 CFR Part 763.93(g)(4).

Principals shall post this correspondence in plain sight, and Chiefs shall include it in the school's AHERA environmental record.
