

Family Survey

- The family survey was sent out via Google Form through our usual channels (social media, website, ParentSquare).
- The results shown are duplicated for families that marked multiple schools. For example, if a family marked CES and SMS as their affiliations, their ratings were filtered into the results for both schools rather than just one.
- Please recall that although results are broken down by school affiliation, this was a division-level survey, with questions tailored to division-level efforts. Example below, showing the 5-point scale used:

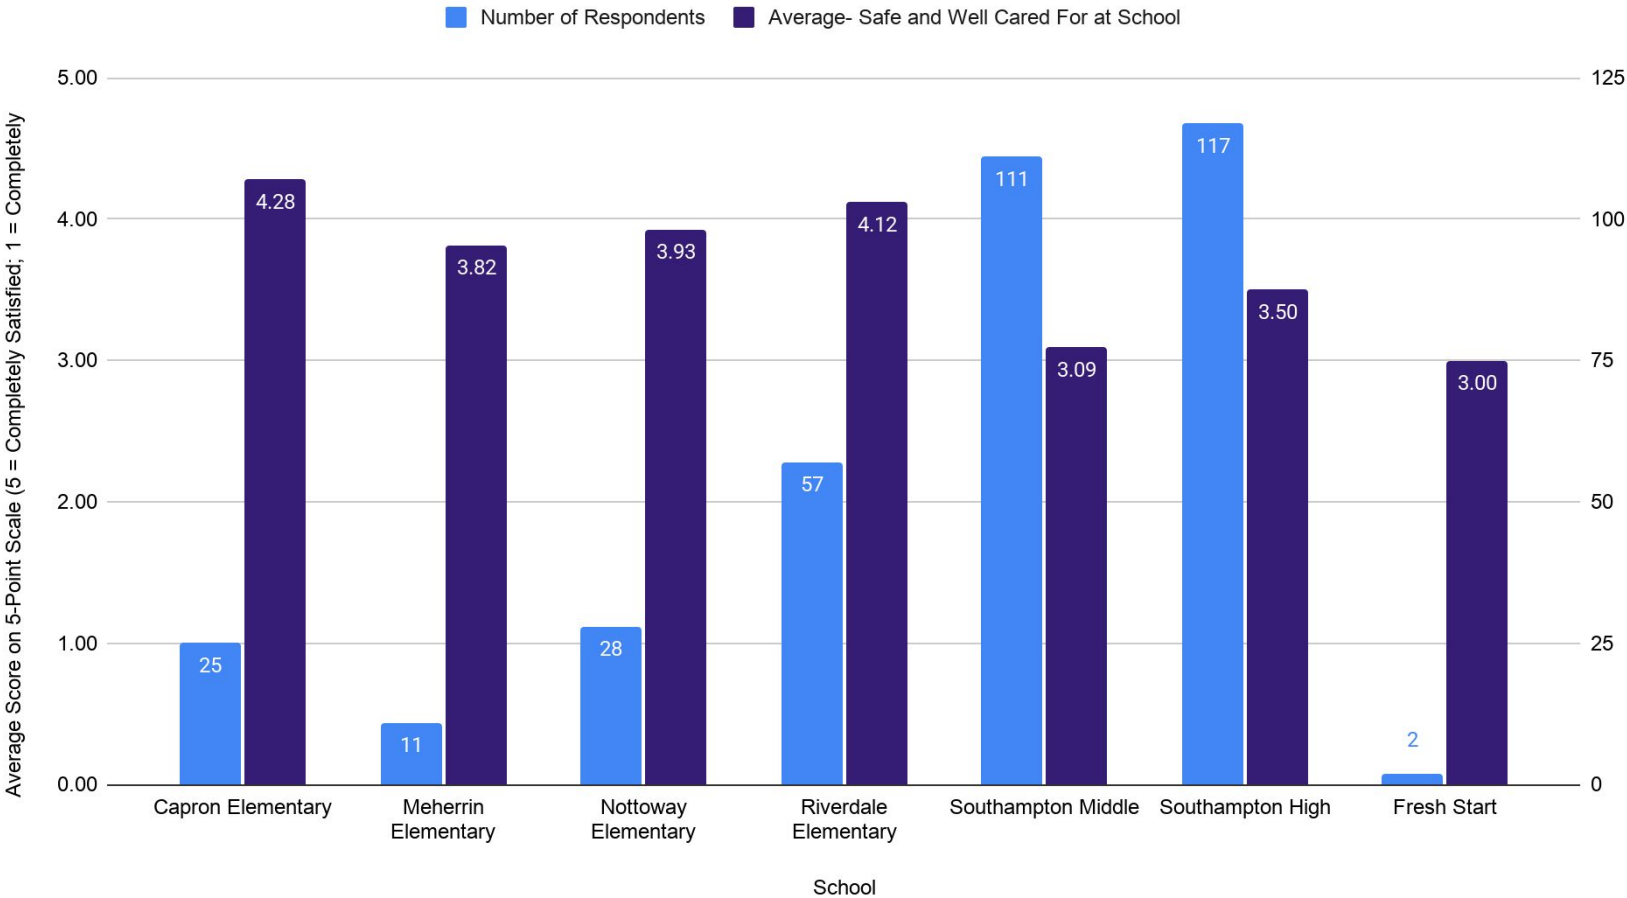

Are you satisfied with the quality and frequency of the division's communication with families? *
